

We are a creative POS company

**“ A whole new kind of POS for your operation,
A whole new kind of Company to deliver it . ”**

01

Company Our Vision.

what we do.

For us it begins with the recognition that our customers are seeking a balance between simplicity, features, style, substance and cost – in their own lives, and in the technology partner they choose. We strive to embody this balance with a strikingly modern approach to software design that is refreshing, powerful and flexible, with an emphasis on ease of use, attentive service and exceptional innovative features. We deliver a revolutionary POS system that helps your business grow by taking the IT out of the product and making it simple.

who are we.

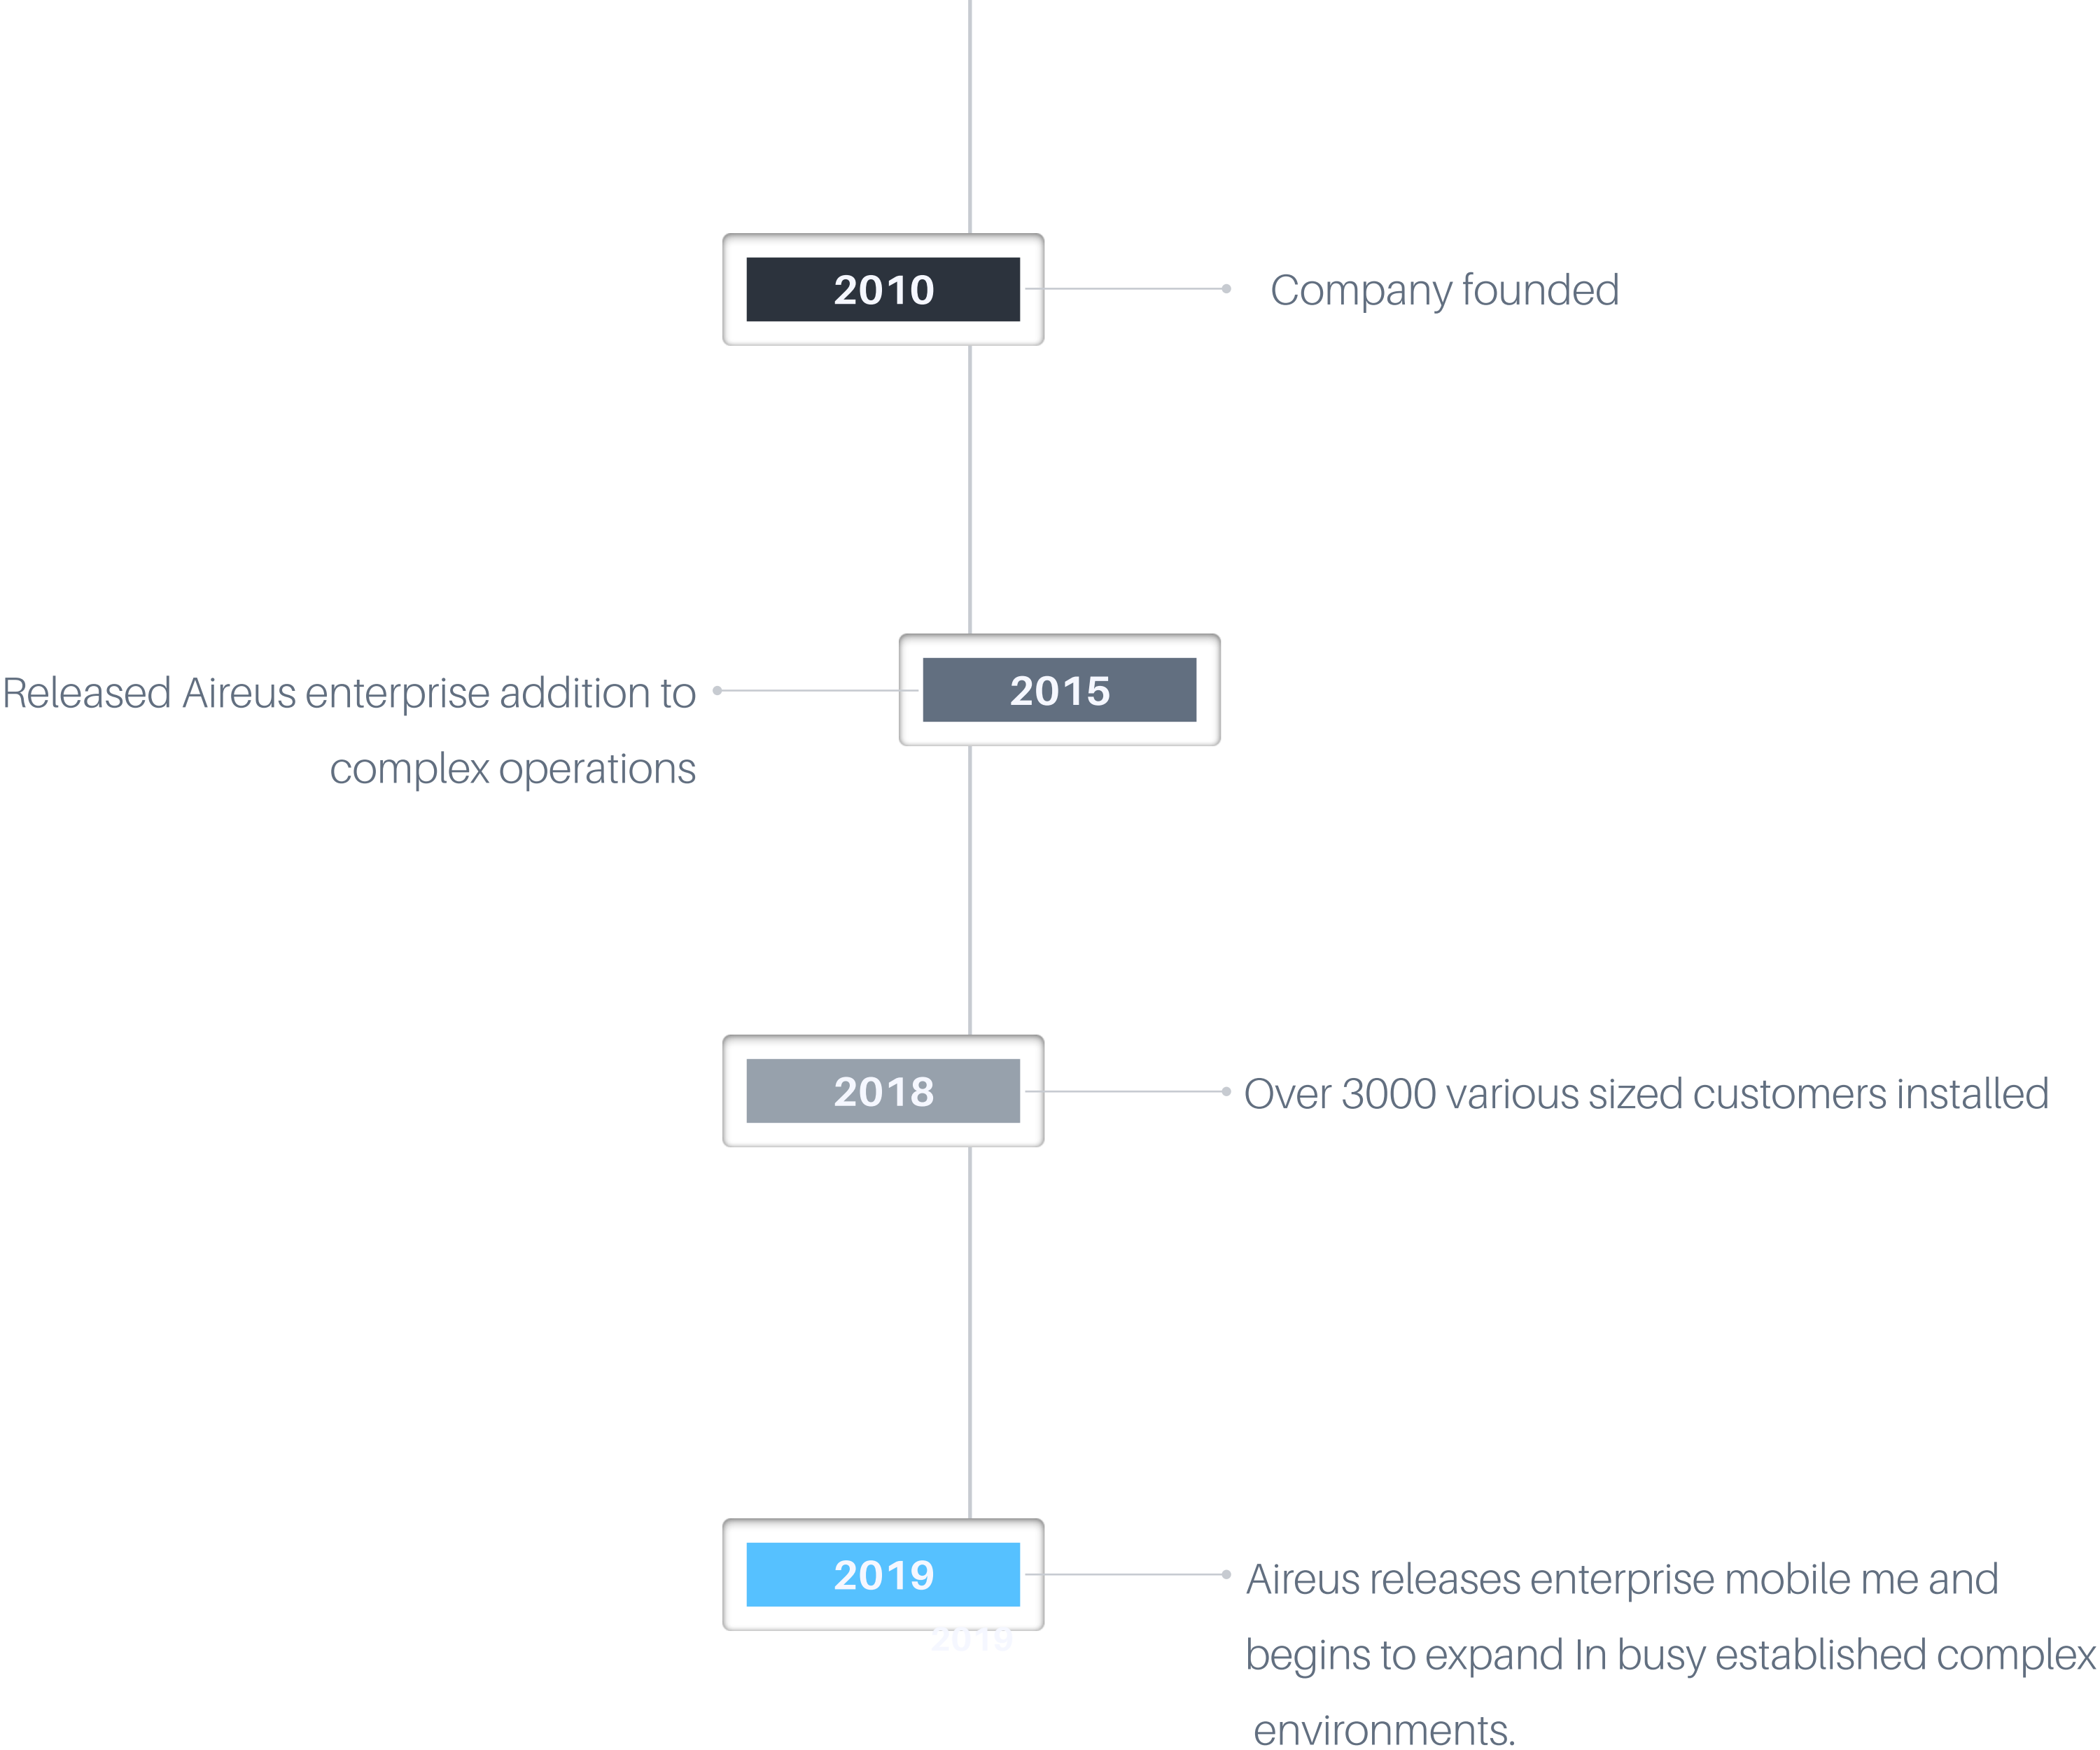

Combining the personality and style of an independent hip boutique software development house with the reliability, consistency and attentive service of a major business, Aireus is redefining the luxury and design-led lifestyle of the next generation in hospitality Point-Of-Sale technology.

we listen, we strategize, we create

Understanding your brand and your specific needs is the key to moving forward together and delivering the right solution. Challenge us with your biggest POS problems, and we'll solve them. Our team and your team work together in open and honest discussions. The focus is solely on developing a solutions that give you the very best experience imaginable.

Aireus

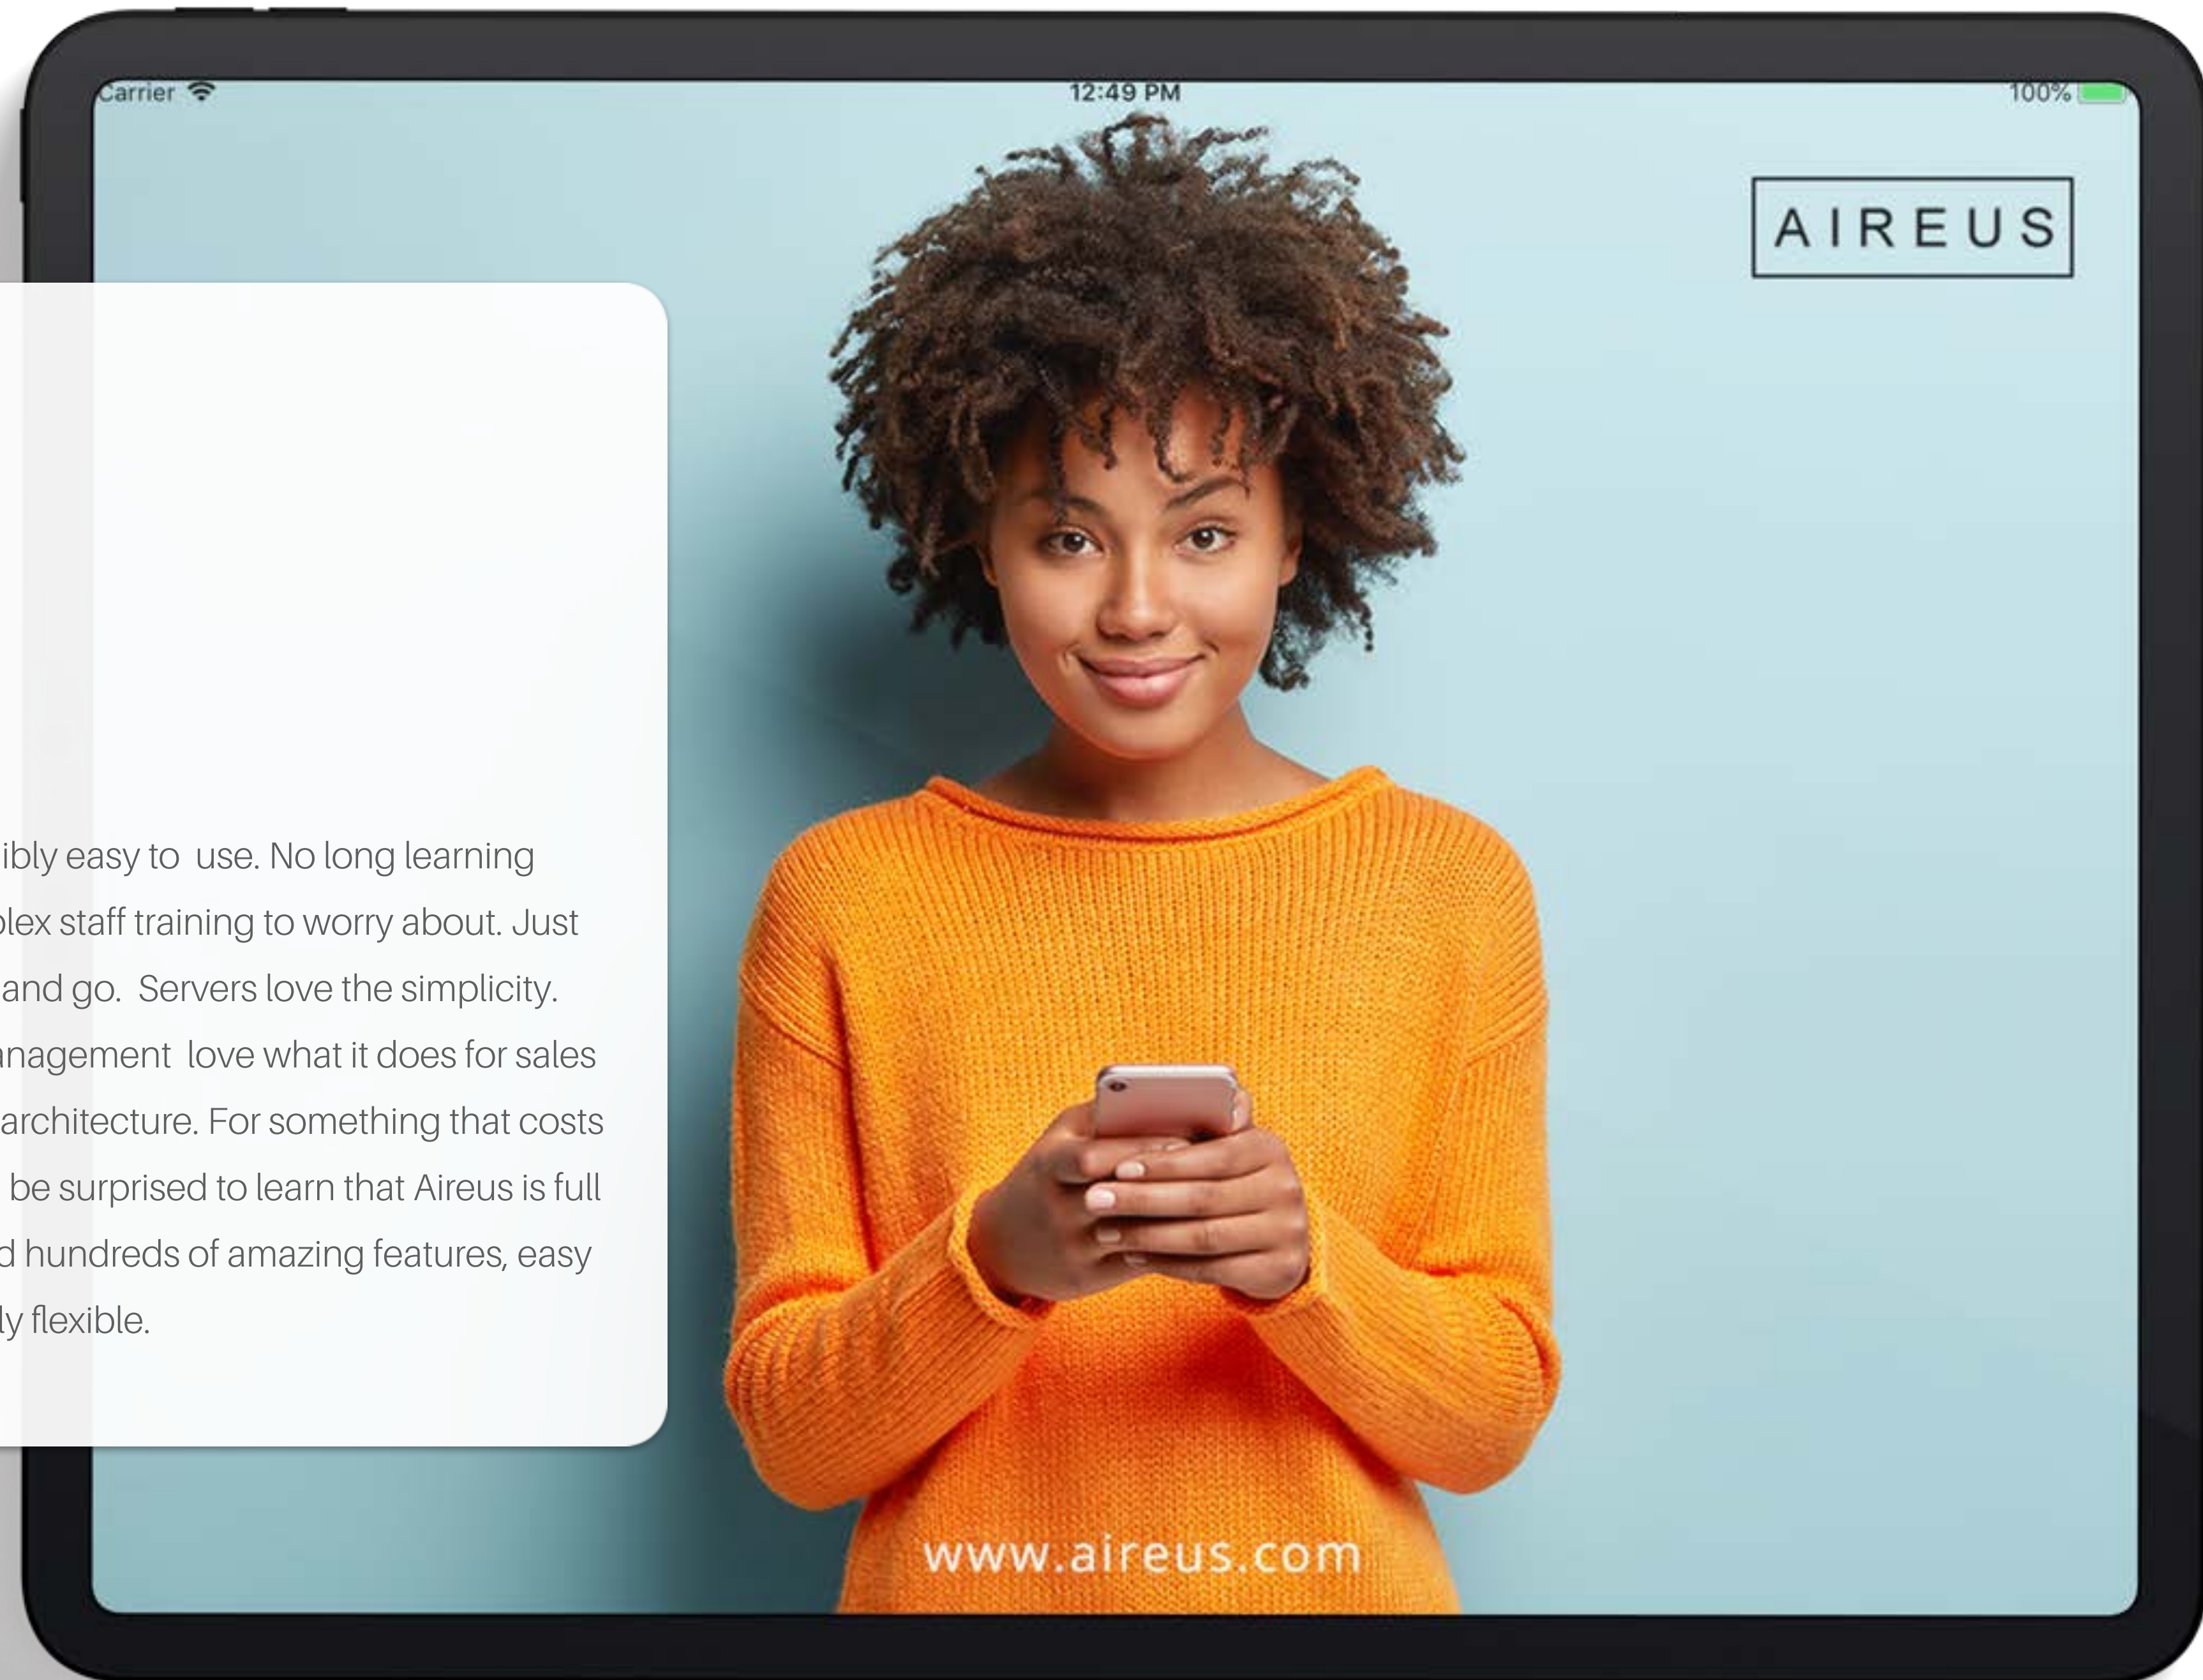

Simple Company Timeline.

“ Everything you need, Anywhere you need it ”

Aireus

Aireus is incredibly easy to use. No long learning curve. No complex staff training to worry about. Just launch the app and go. Servers love the simplicity. Owners and management love what it does for sales and its modern architecture. For something that costs a lot less, you'd be surprised to learn that Aireus is full of hundreds and hundreds of amazing features, easy to use and totally flexible.

“Recognized for innovation and ideas.”

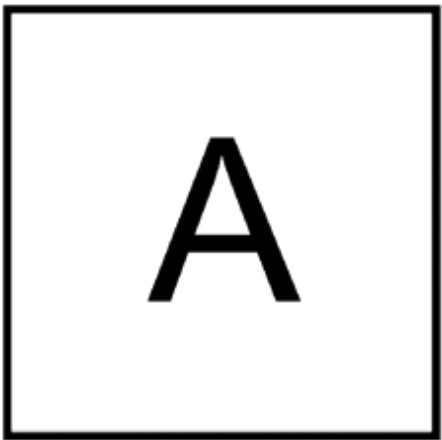

Introducing a new way to build relationships. It’s a new type of restaurant Point of Sale concept called Aireus and it changes the way restaurant owners, managers, front-of-the-house staff and back-of-the-house staff all interact with customers, each other, and their restaurant software.

“Aireus, the hospitality landscape we cater to.”

The main components of the hospitality industry are F&B, lodging, recreation, and travel and tourism. Aireus is focused on the Food and Beverage market. This sphere is also called foodservice and It consists of businesses, institutions, and companies that prepare and service food for their guests.

Meet a few of our customers.

We are a Customer Focused Company and our mission is simple. We're passionate about putting our customers first and building success stories around them. Like no other restaurant POS before, Aireus is revolutionizing ways and always developing new ideas that helps you collaborate with your customer.

CaTECH

“Providing customers with Digital TV’s, Telephony and Networking.”

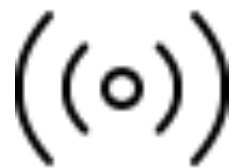

Our Technology Infrastructure Transformation practice brings together a network of professionals and engineers with deep experience across technology, strategy, deployment and project management to help transform the way our clients run their technology infrastructure projects. We help our clients gain increased agility, lower risk, greater scalability, and improved service quality across all their infrastructure requirements. From Data center facilities, infrastructure, and automation to workplace technology, messaging and voice to all your digital marketing requirements.

Digital AV

.From digital menu boards, to video walls and conference rooms, CaTECH’s team of experts create simple solutions to help you get the right information to the right people at the right time.

Telephony

Your communication system is the lifeline to your business. At CaTECH we understand this demand for such a mission critical application. Technologies such as VoIP, Enhanced Contact Centers, Speech Recognition and CTI Integration are converging on the “IP” Infrastructure adding complexity.

Networks

CaTECH’s Wireless Systems Engineers have assisted many organizations in overcoming challenges within their existing wireless networks. By providing a full analysis of the issues, we are able to build a migration plan that will scale your network as business requirements demand

“Hundreds of innovative and business solving features.”

"Whats under the hood?"

Our modern approach and tools for enterprise development deliver applications more quickly to our customers, while still maintaining control over our environment as we scale the numbers of containerized applications running within it. Aireus has been able to deliver agility, portability and innovative apps and features to our customers.

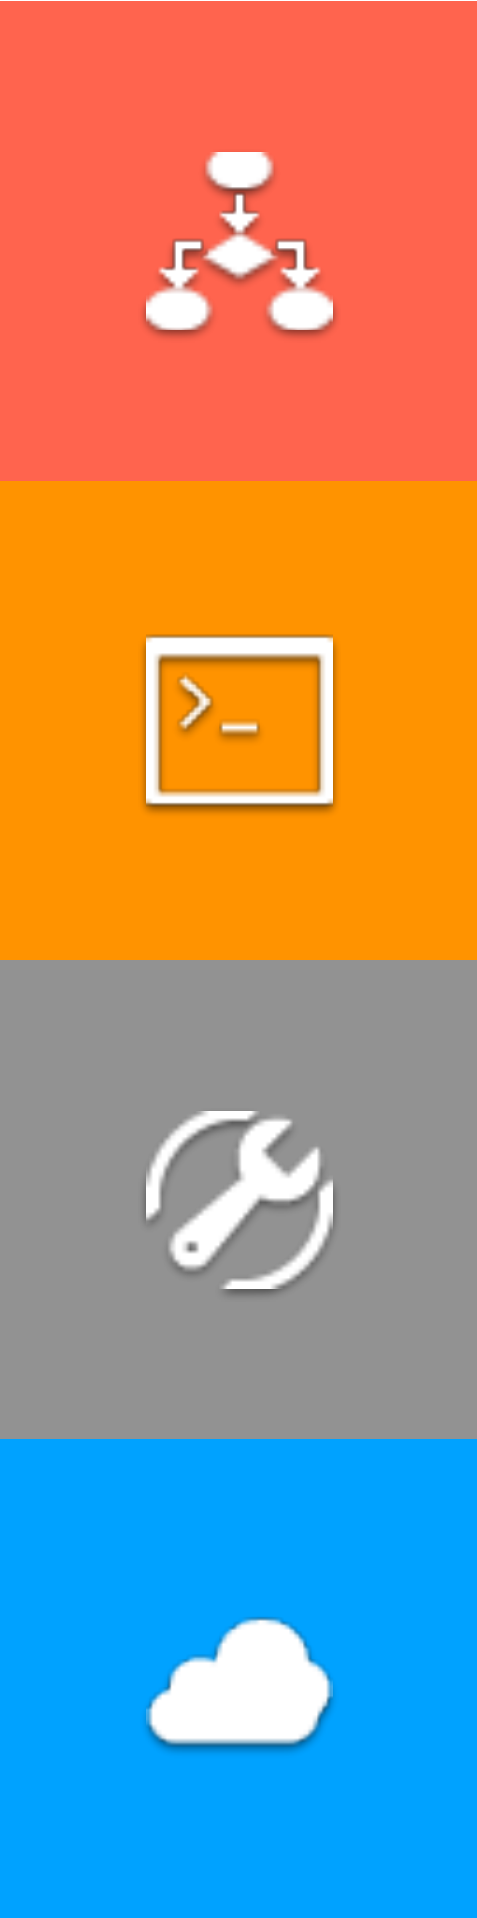

“ A simple intuitive and powerful design.”

Together, we can make your mobile solution idea a reality. We focus, work hard, treat every project like our own and apply our years of experience building and delivering mobile solutions that delight, engage and connect.

“ We squeezed the most into it. And out of it.”

No other company offers custom development and project management services like Aireus. The Aireus API is ideal for developers who want to build a custom interface or extra data from our point-of-sale solution. Our POS API allows you to integrate payments, gift cards, online ordering, loyalty and other 3rd party products.

Fast Connections

Aireus is optimized to handle your traffic and performance concerns. We only work with state of the art hosting partners around the globe.

iOS Android Java Applications

We only use modern tools to build our apps and we stay ahead of the curve so you can have the latest technology.

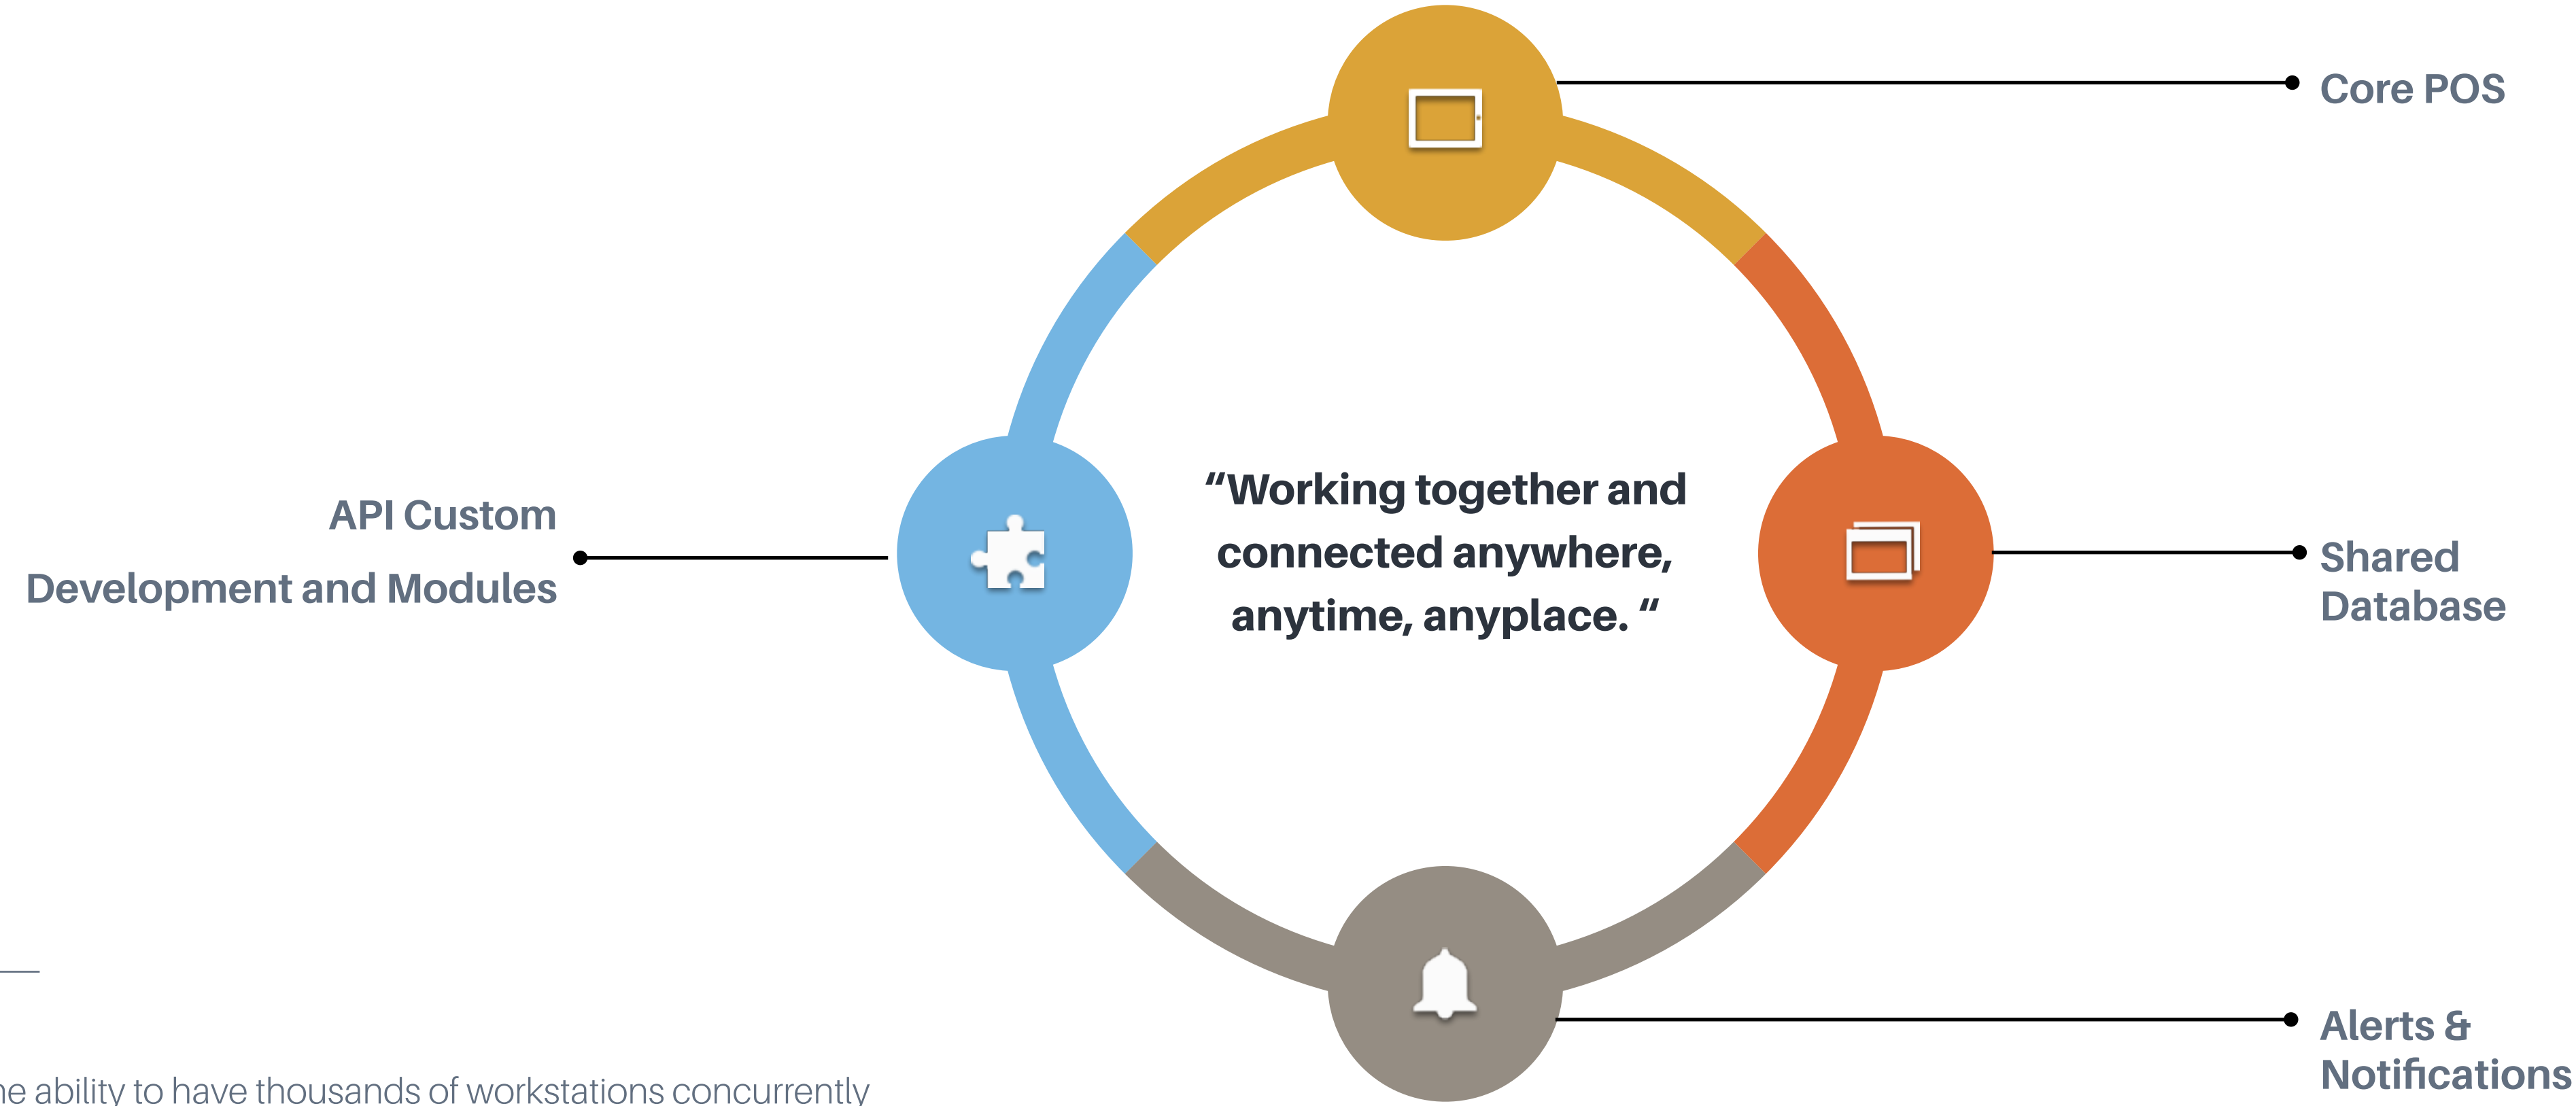

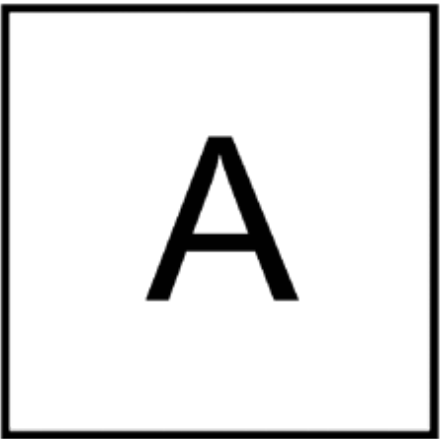

Extended API for 3rd Party Parties

We partner and interface with industry leaders to provide you with a best of breed approach to selecting a partner of your choice.

Wireless Ethernet Cloud Wifi or 4G

Aireus offers you multiple options to connect your device. From Cell to wired Ethernet. You Choose.

“More tools to help you do more.”

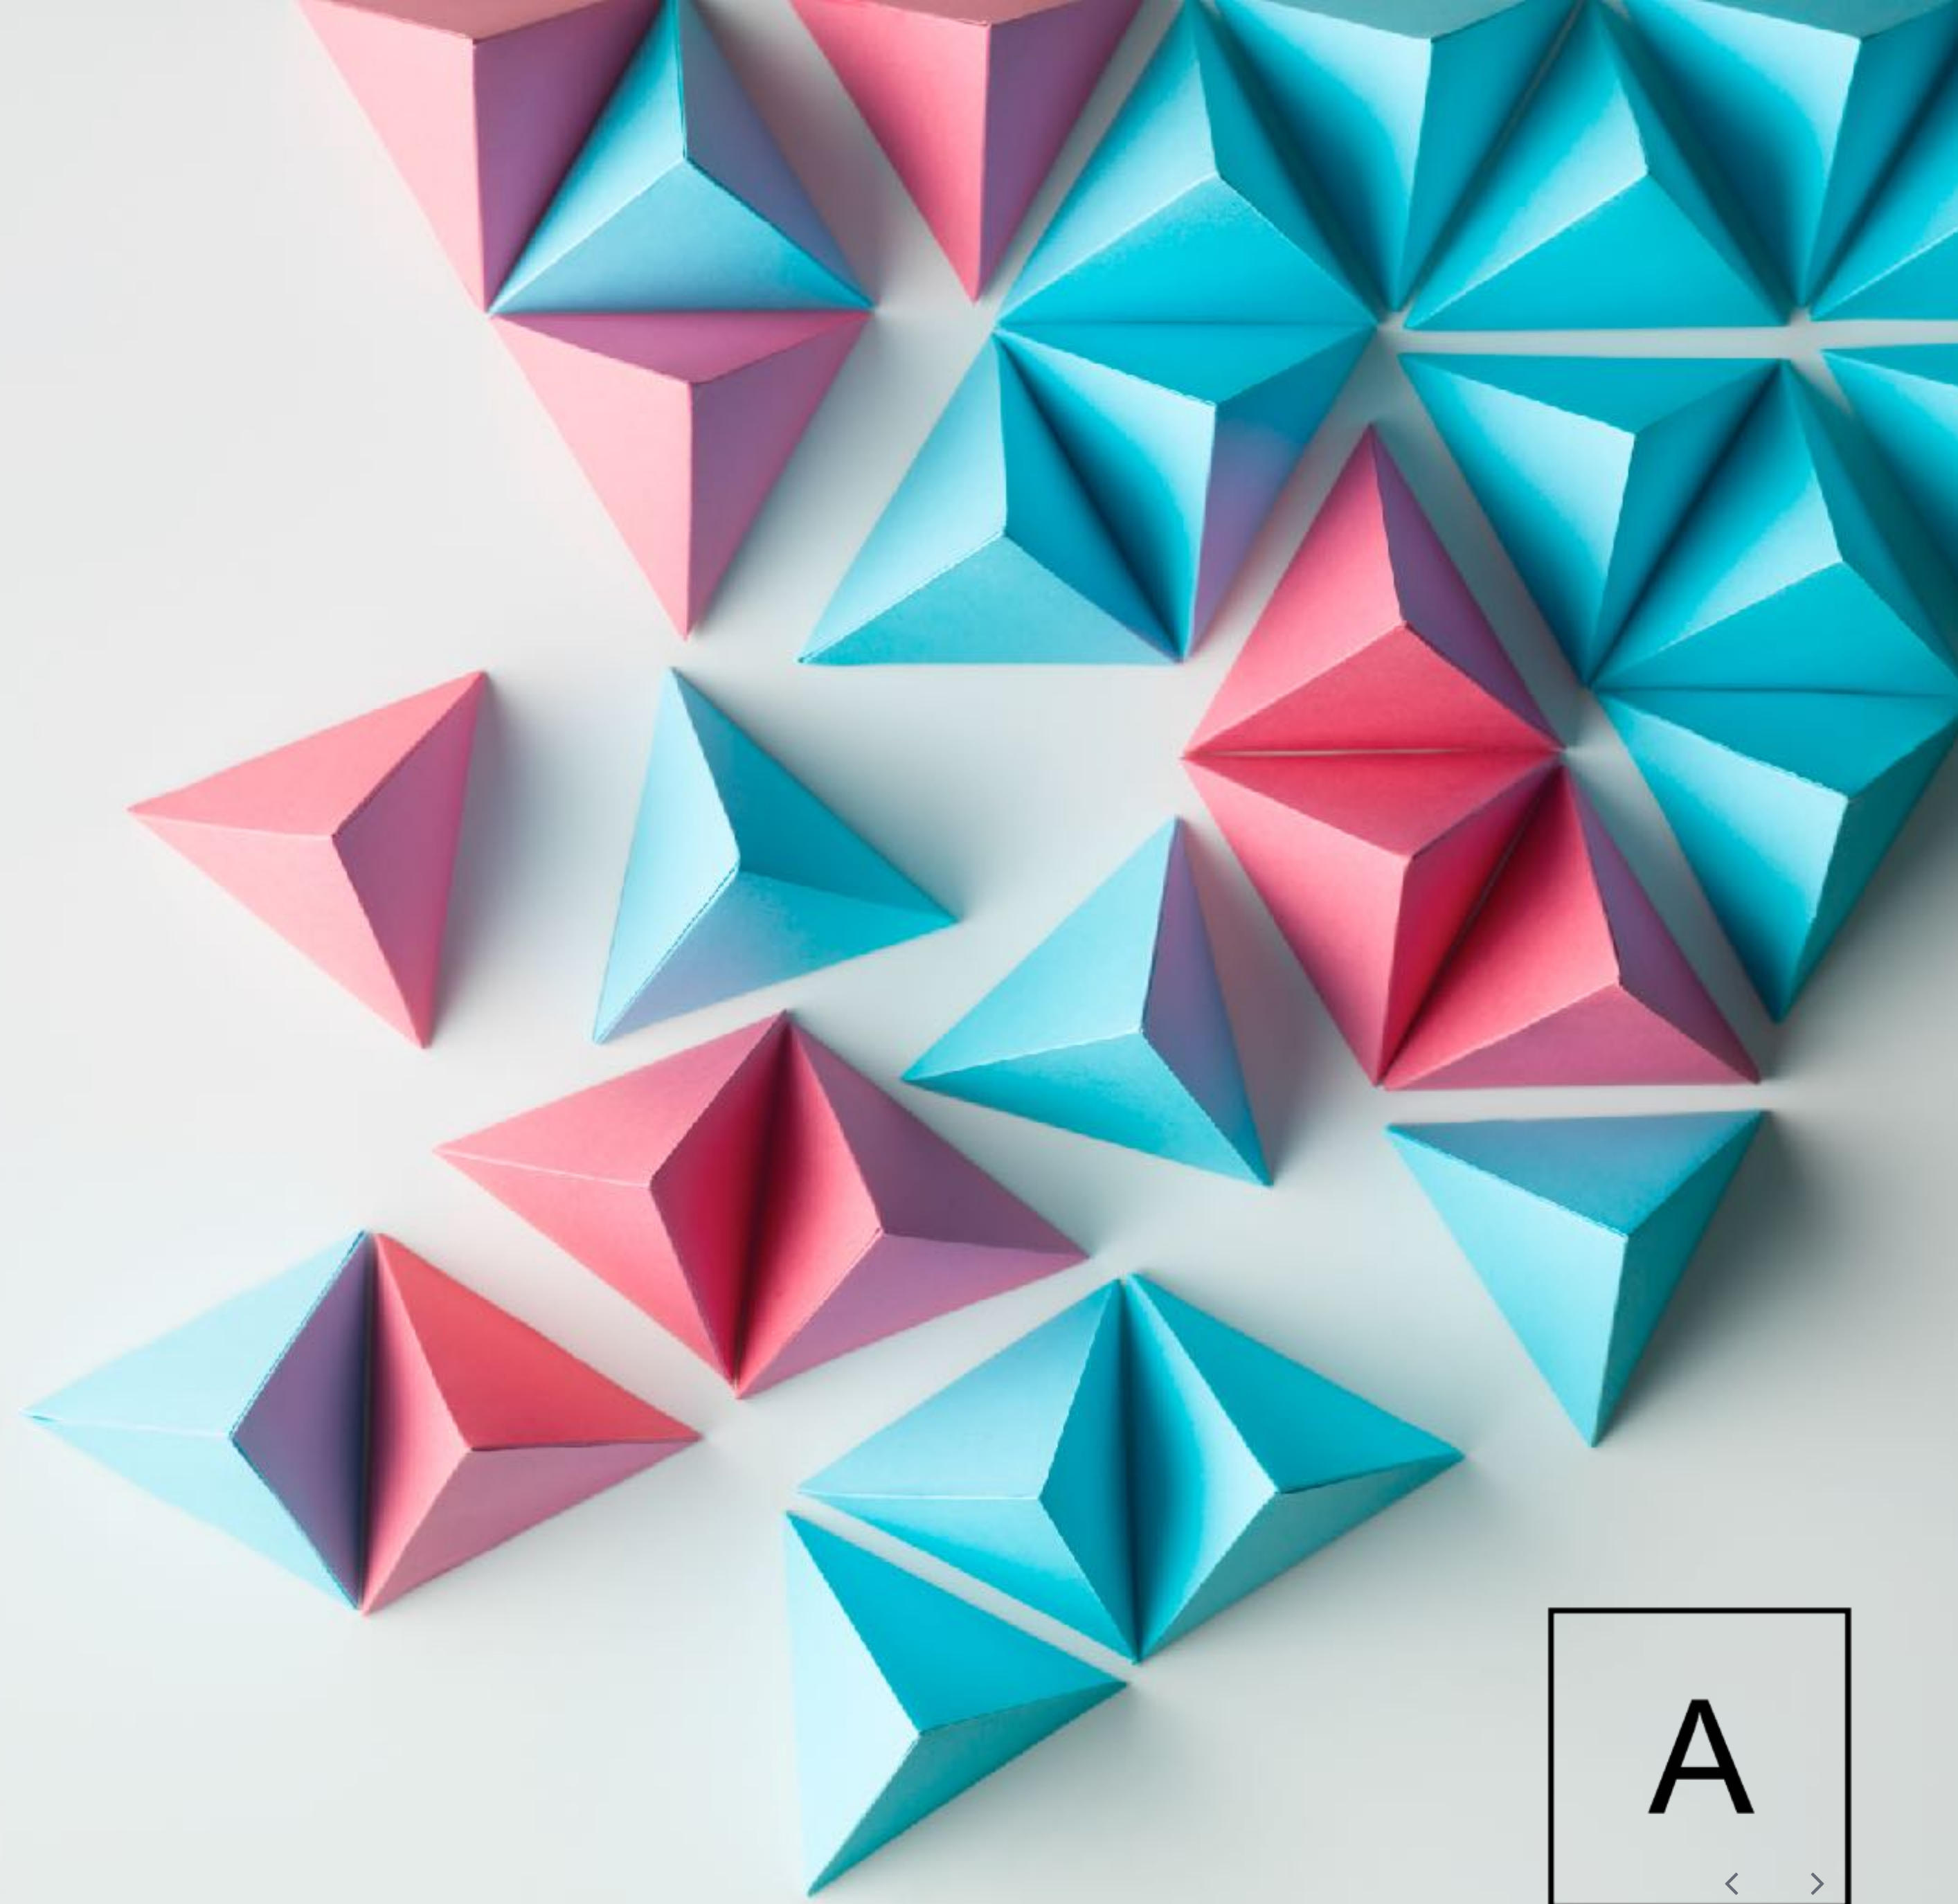

The ability to have thousands of workstations concurrently running that are producing tens of thousands of transactions and have the flexibility to easily upgrade of the System while maintaining true enterprise functionality all this is done with resiliency through redundancy- LANS and the Internet.

“Flexible across the globe.”

Aireus offers features specific to country and regional requirements

- Adapts to a mixed service environment (e.g., drive-thru, counter service, delivery or curbside service)
- Single database for multi-brand operations
Scalable from small, single-terminal sites to multiple revenue center operations
- Provides multi-language support, including double-byte characters Supports multiple currencies, including the EURO
- Adjusts to country-specific tax Systems, including the complex tax jurisdictions used in all U.S. municipalities and throughout the international community.

Aireus Mobile Manager

03

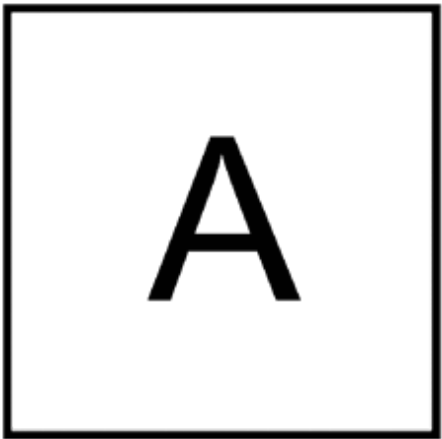

**“Everything at your
finger tips.”**

Aireus has created and built a specific app for the Apple iWatch and iPhone with features that include dashboard reports, alerts and notifications as well as manager approval and messaging features that are delivered real-time.

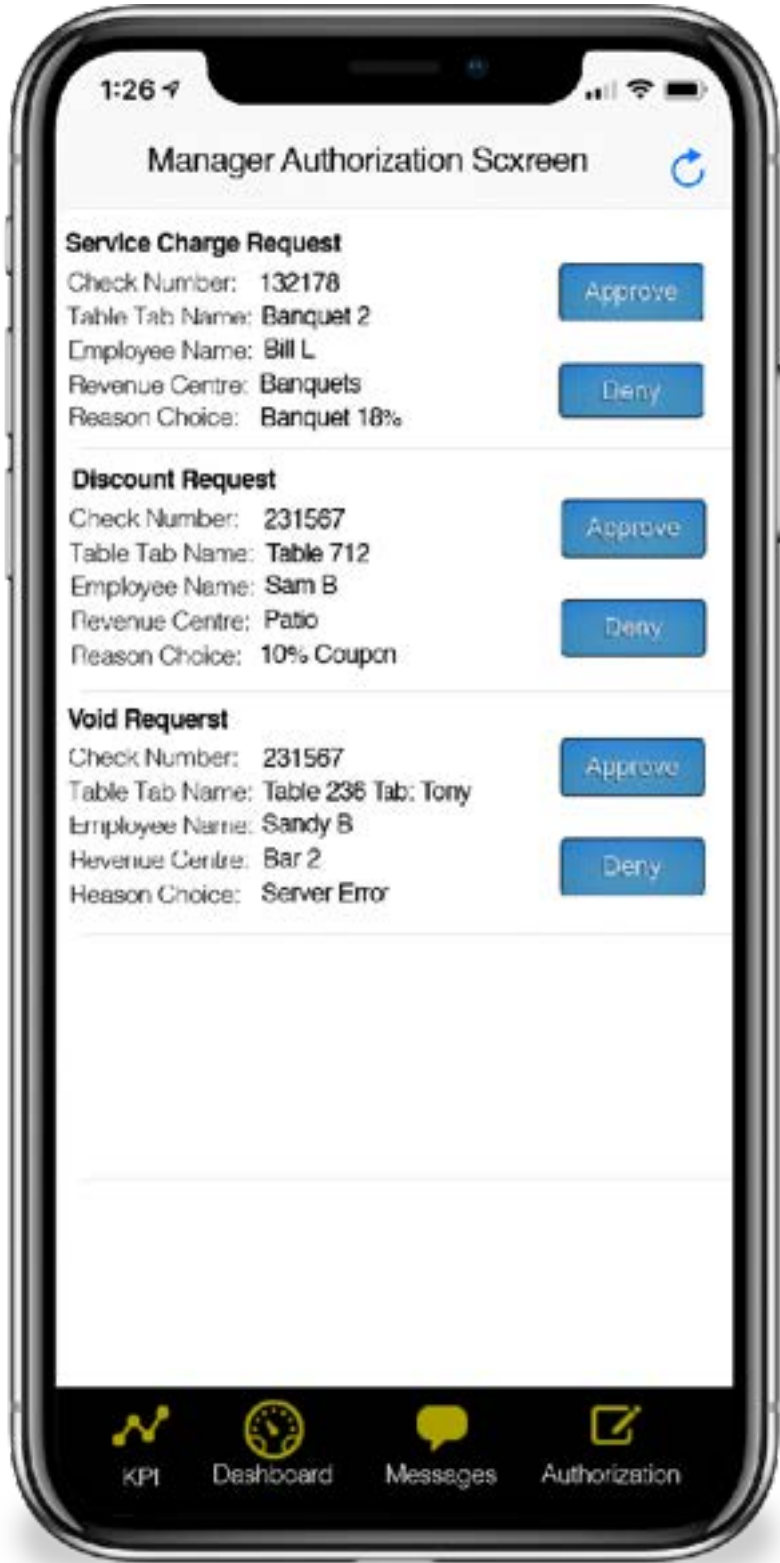

“Get more out of your phone with mobile manager.”

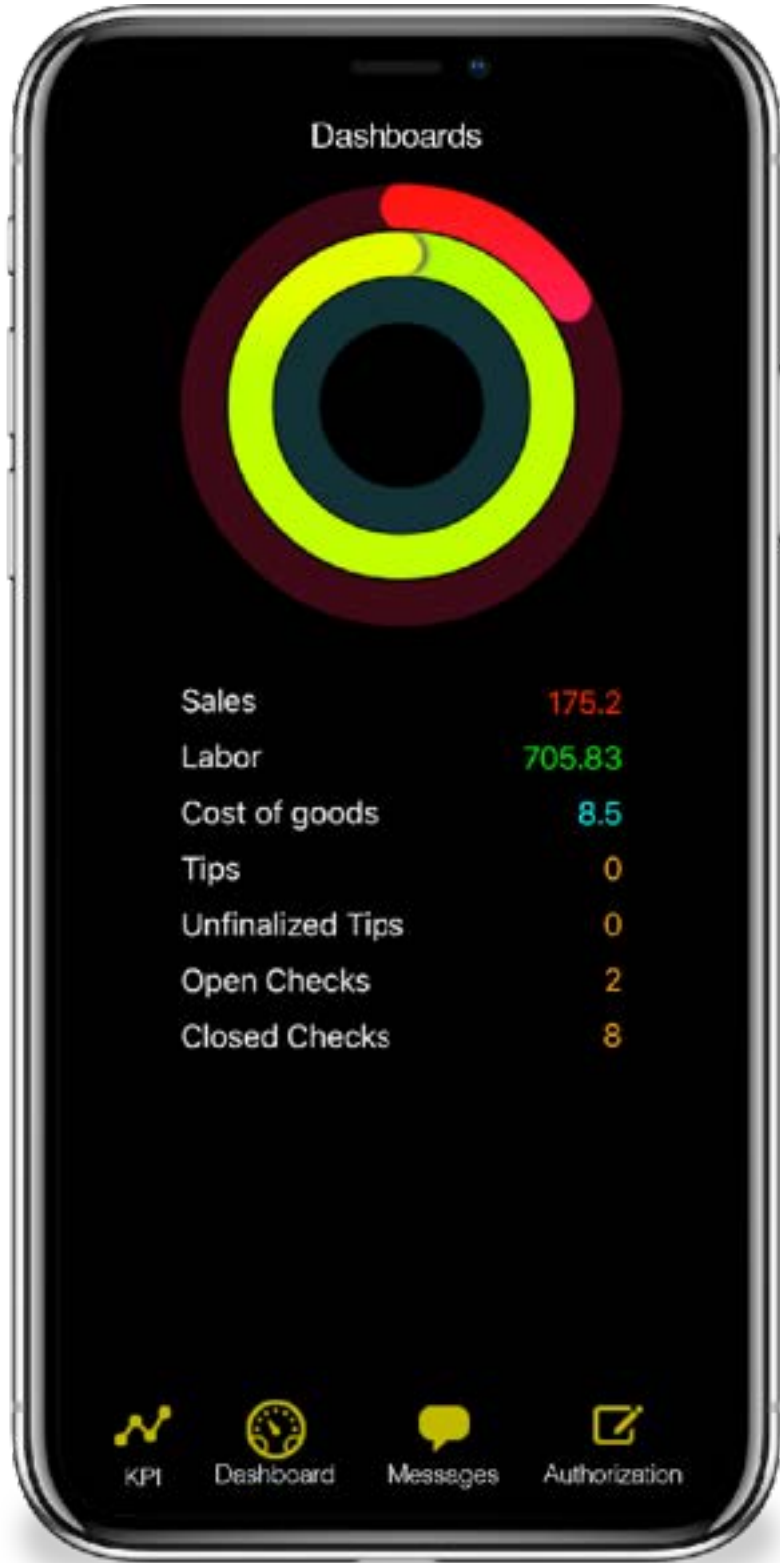

Aireus allow operations to manage by exception. The system monitors conditions and compares them to established standards. Exceptions are immediately identified and a notice or alert is sent to owners, district managers, store managers or specific individuals via cell phone, PDA or email, allowing management to be proactive vs. reactive. Whether you want to monitor overtime, or keep an eye on loss prevention “Alerts” will provide you all of the information you require to control costs and improve customer satisfaction, by monitoring your standard business metrics, allowing you to redirect resources where they are needed.

Analytics Screen

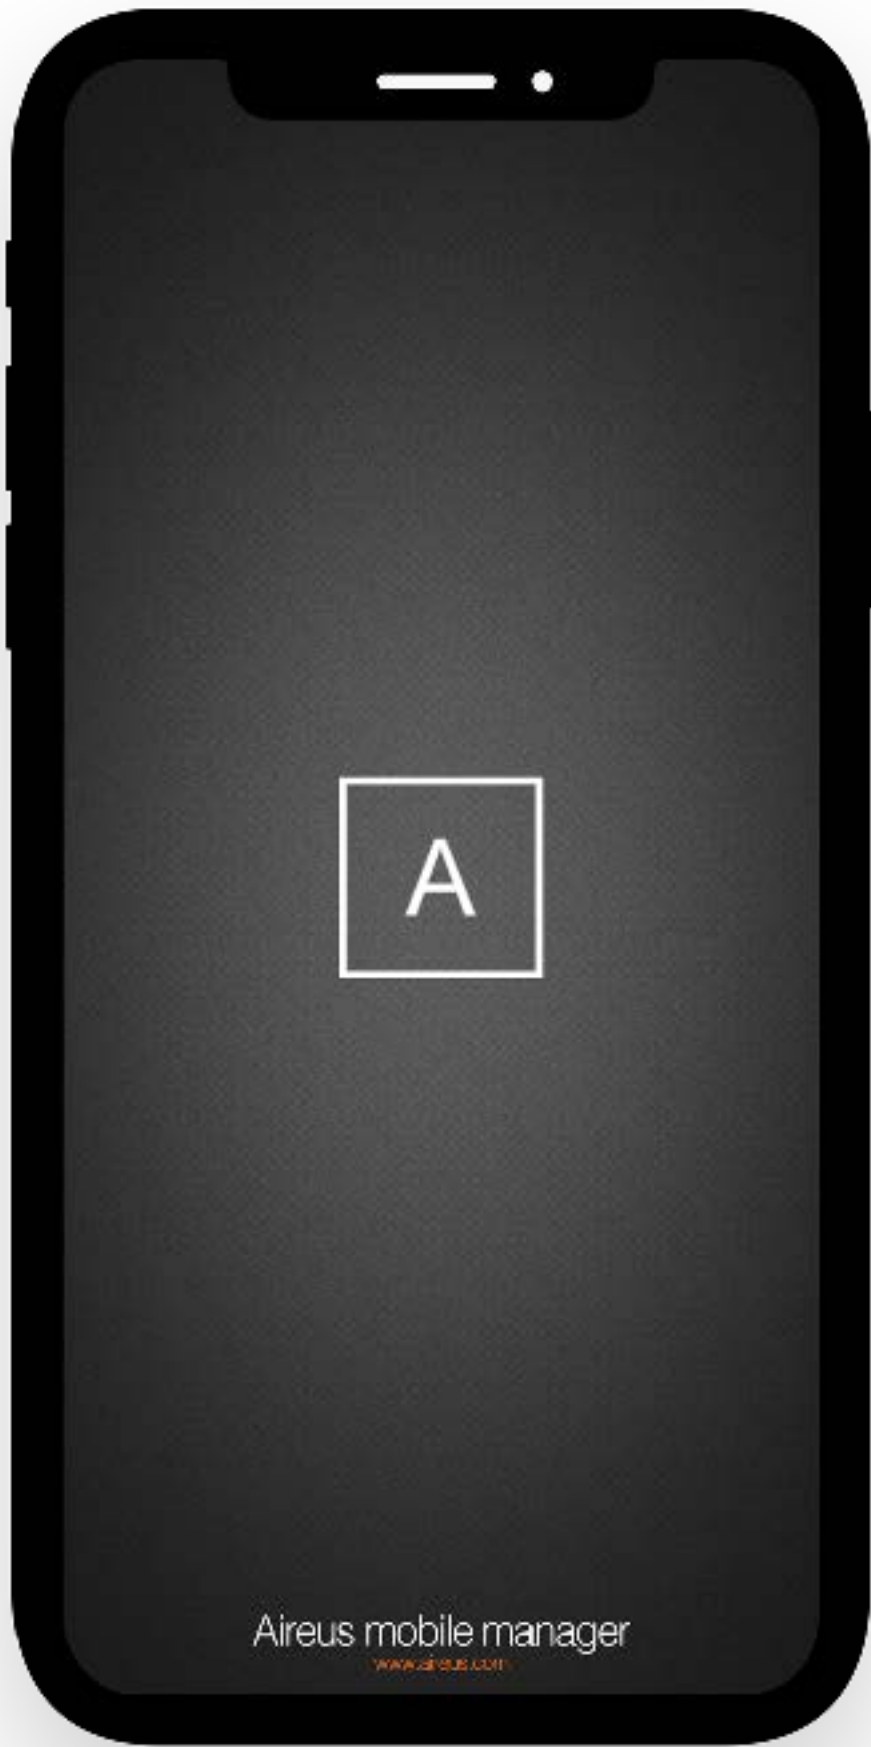

Authorization Screen

Manager real-time employee request for authorizations .

Accessible via iPhone and the iWatch from anywhere anyplace anytime.

“On the go mobile alerts notifications and dashboards.”

Analytics

With Aireus mobile manager you can view critical operational metrics on your device simply by using your iWatch or iPhone anywhere anytime.

Authorizations

With Aireus authorizations you can truly be mobile and approve voids, adjustments, discounts, comps and much more. All from your device anytime anyplace anywhere.

Dashboards

Looking for operational information on the spot, simply jump to your dashboards for a real-time pulse of your business.

“All new ways to do all kinds of things.”

The Apple iWatch is a wearable smartwatch that allows users to accomplish a variety of tasks, including making phone calls, sending text messages and reading email. To function, the Apple iWatch must be connected to an iPhone 5 or later. The Apple iWatch iPhone app allows users to change settings, rearrange apps, choose notifications and download new apps from their iPhone. The Apple Watch interface was designed specifically for the wrist, and navigation relies on swiping and tapping. Its Digital Crown is a physical navigation dial located on the side of the watch that magnifies content, scrolls and inputs data.

Aireus Apple TV Ordering

04

“The world is complicated this isn't.”

A

Installing Apple TV costs less than typical Video on demand subscriptions, and can deliver access to users' own content, allowing them to log into their personal Apple Music, iTunes and Netflix accounts, for example. video on demand content is both more limited in scope and more expensive for the hotel to provide. Apple TV provides access to a range of English-language content for guests, and is more familiar to younger audiences than other offerings targeted toward the hospitality industry. Additionally, Apple TV units can be managed centrally using the same software used to manage enterprise iOS devices and Macs. And conceptually, if installed on the same network as WiFi routers, Apple TV can offer AirPlay streaming to guests to allow them to view their personal iPhone content, including photos and videos, on in-room TVs.

“A new and innovative easy way to take orders.”

With our revolutionary affordable in-room Apple TV app, guests can now indulge and experience a meal without having to call an agent. They simply browse the menu and customize each dish just to their liking and order. Both your staff and guests will find Aireus In Room Dining app an intuitive and efficient way to order. From subtle up-sells and push notifications to offers and promotions your property, your style, your brand.

WWW.

“ Analyze. Visualize. Conceptualize.”

Aireus Point of Sale

www.aireus.com

For us it begins with the recognition that our customers are seeking a balance between simplicity, features, style, substance and cost – in their own lives, and in the technology partner they choose. We strive to embody this balance with a strikingly modern approach to software design that is refreshing, powerful and flexible, with an emphasis on ease of use, attentive service and exceptional innovative features.

“Hundreds of amazing features in your hands.”

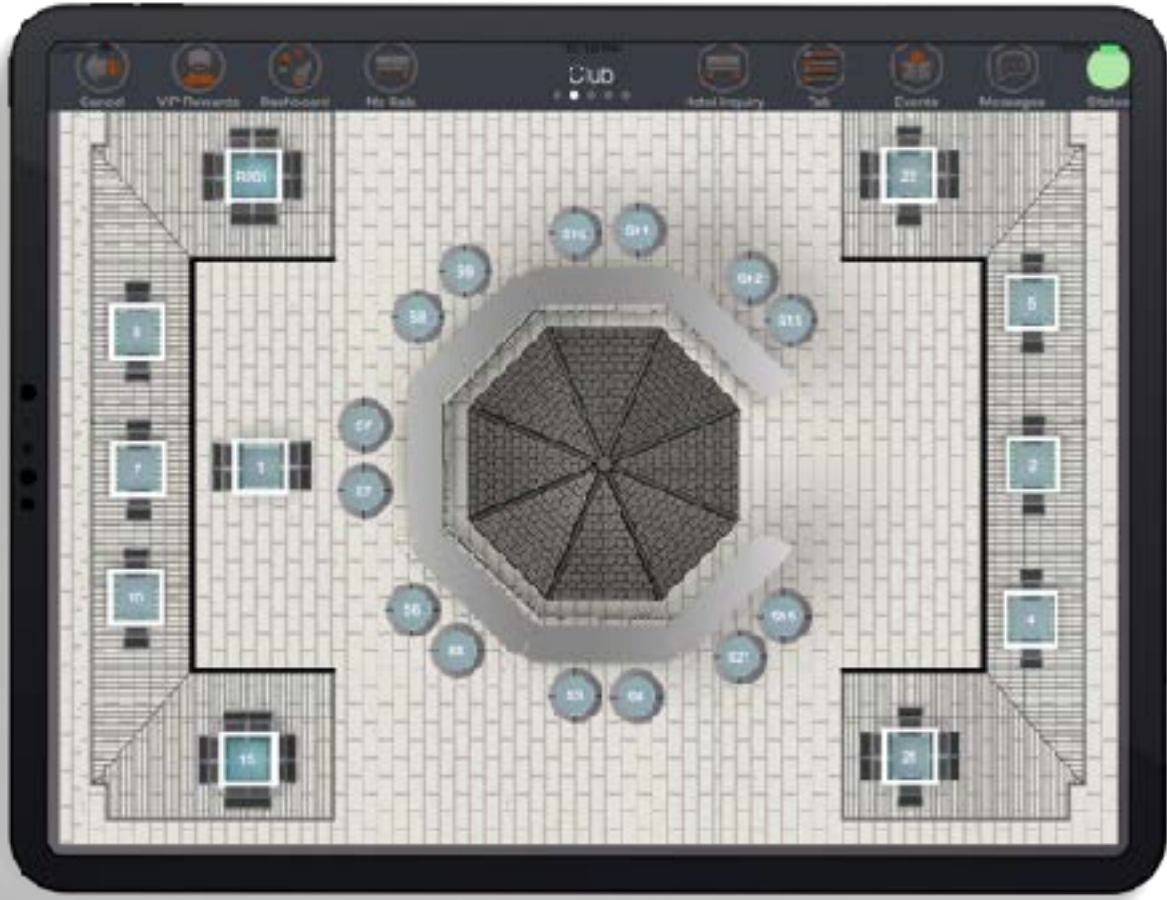

Multi-concept Model

For multi-concept operations, the Enterprise Management Console (EMC) allows for the management of the entire system from within a single application. Users are able to create and define the parameters of the enterprise, properties, and revenue centres from any PC that has access to the central server, thus allowing local users to make changes to their configuration if necessary.

Offline Resiliency

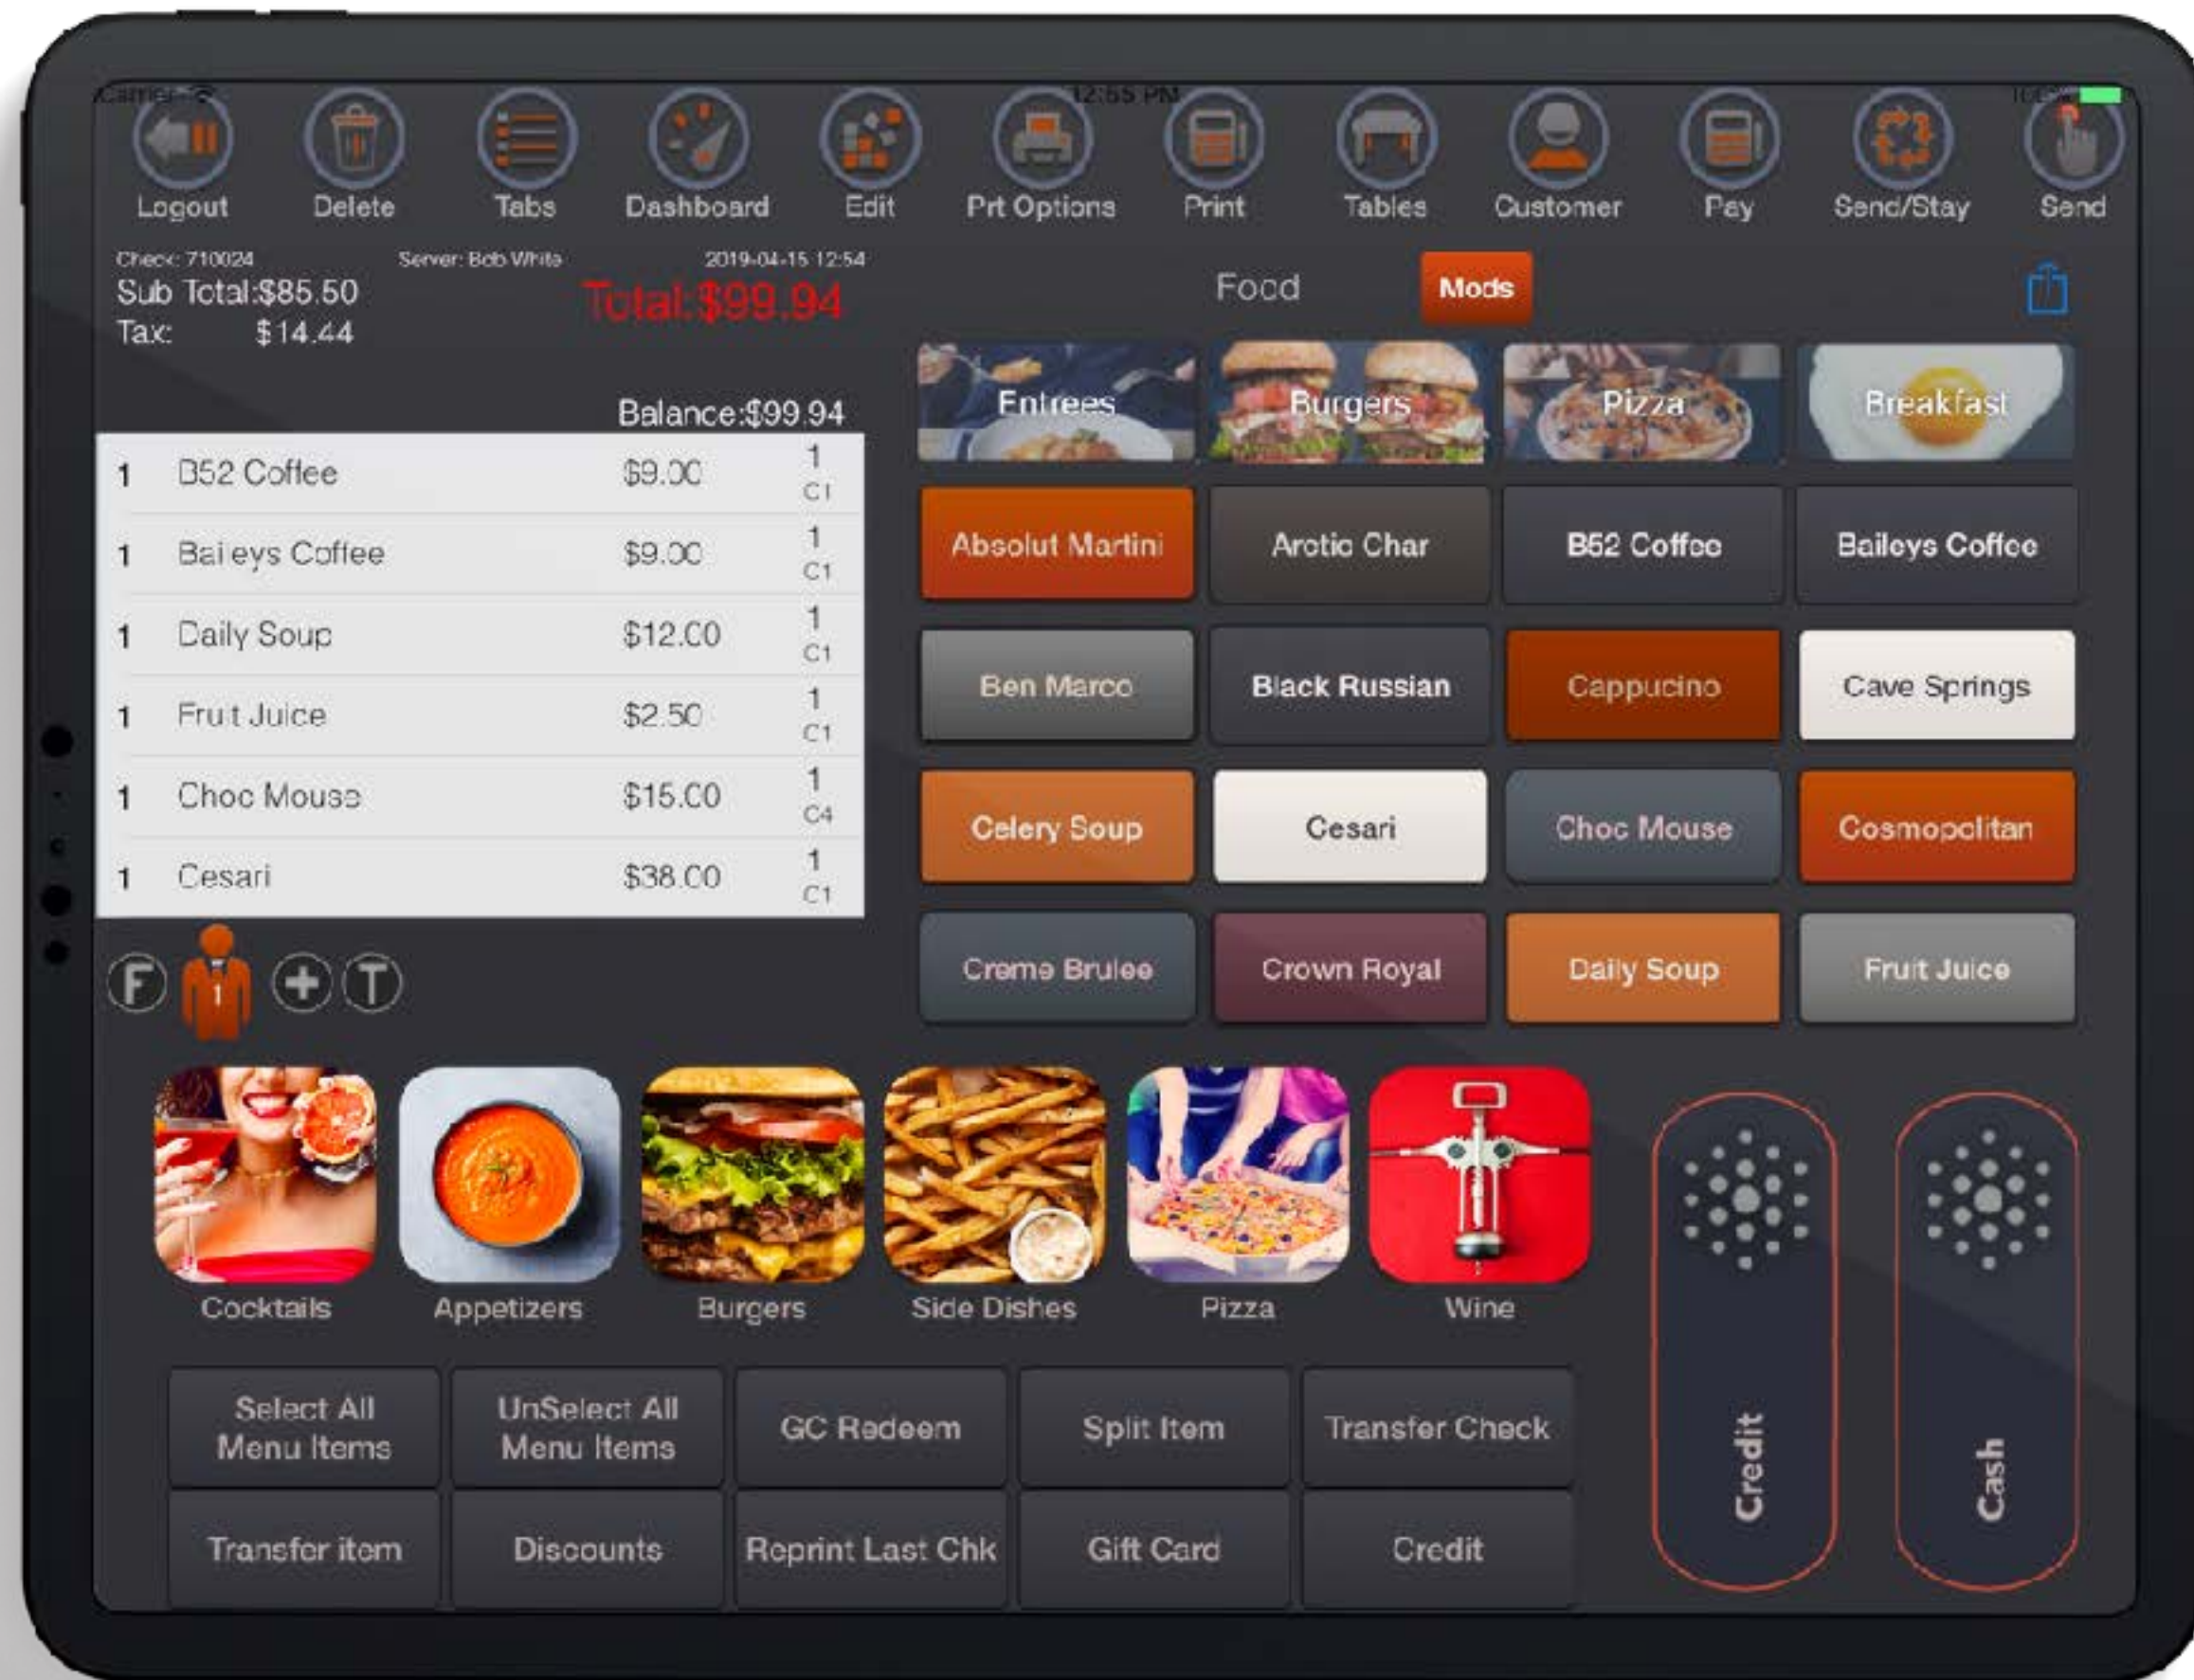

Multiple levels of resiliency complement Aireus’s advanced scalability, enabling the client to perform mission-critical operations in the event of an upstream technical failure. This means that even during an internet outage, SOA enables the business to process credit cards, use the paperless Kitchen Display System and remote printers, and continue operational reporting by running these services locally.

From Table Service to Quick Service

Feature rich deep payment options

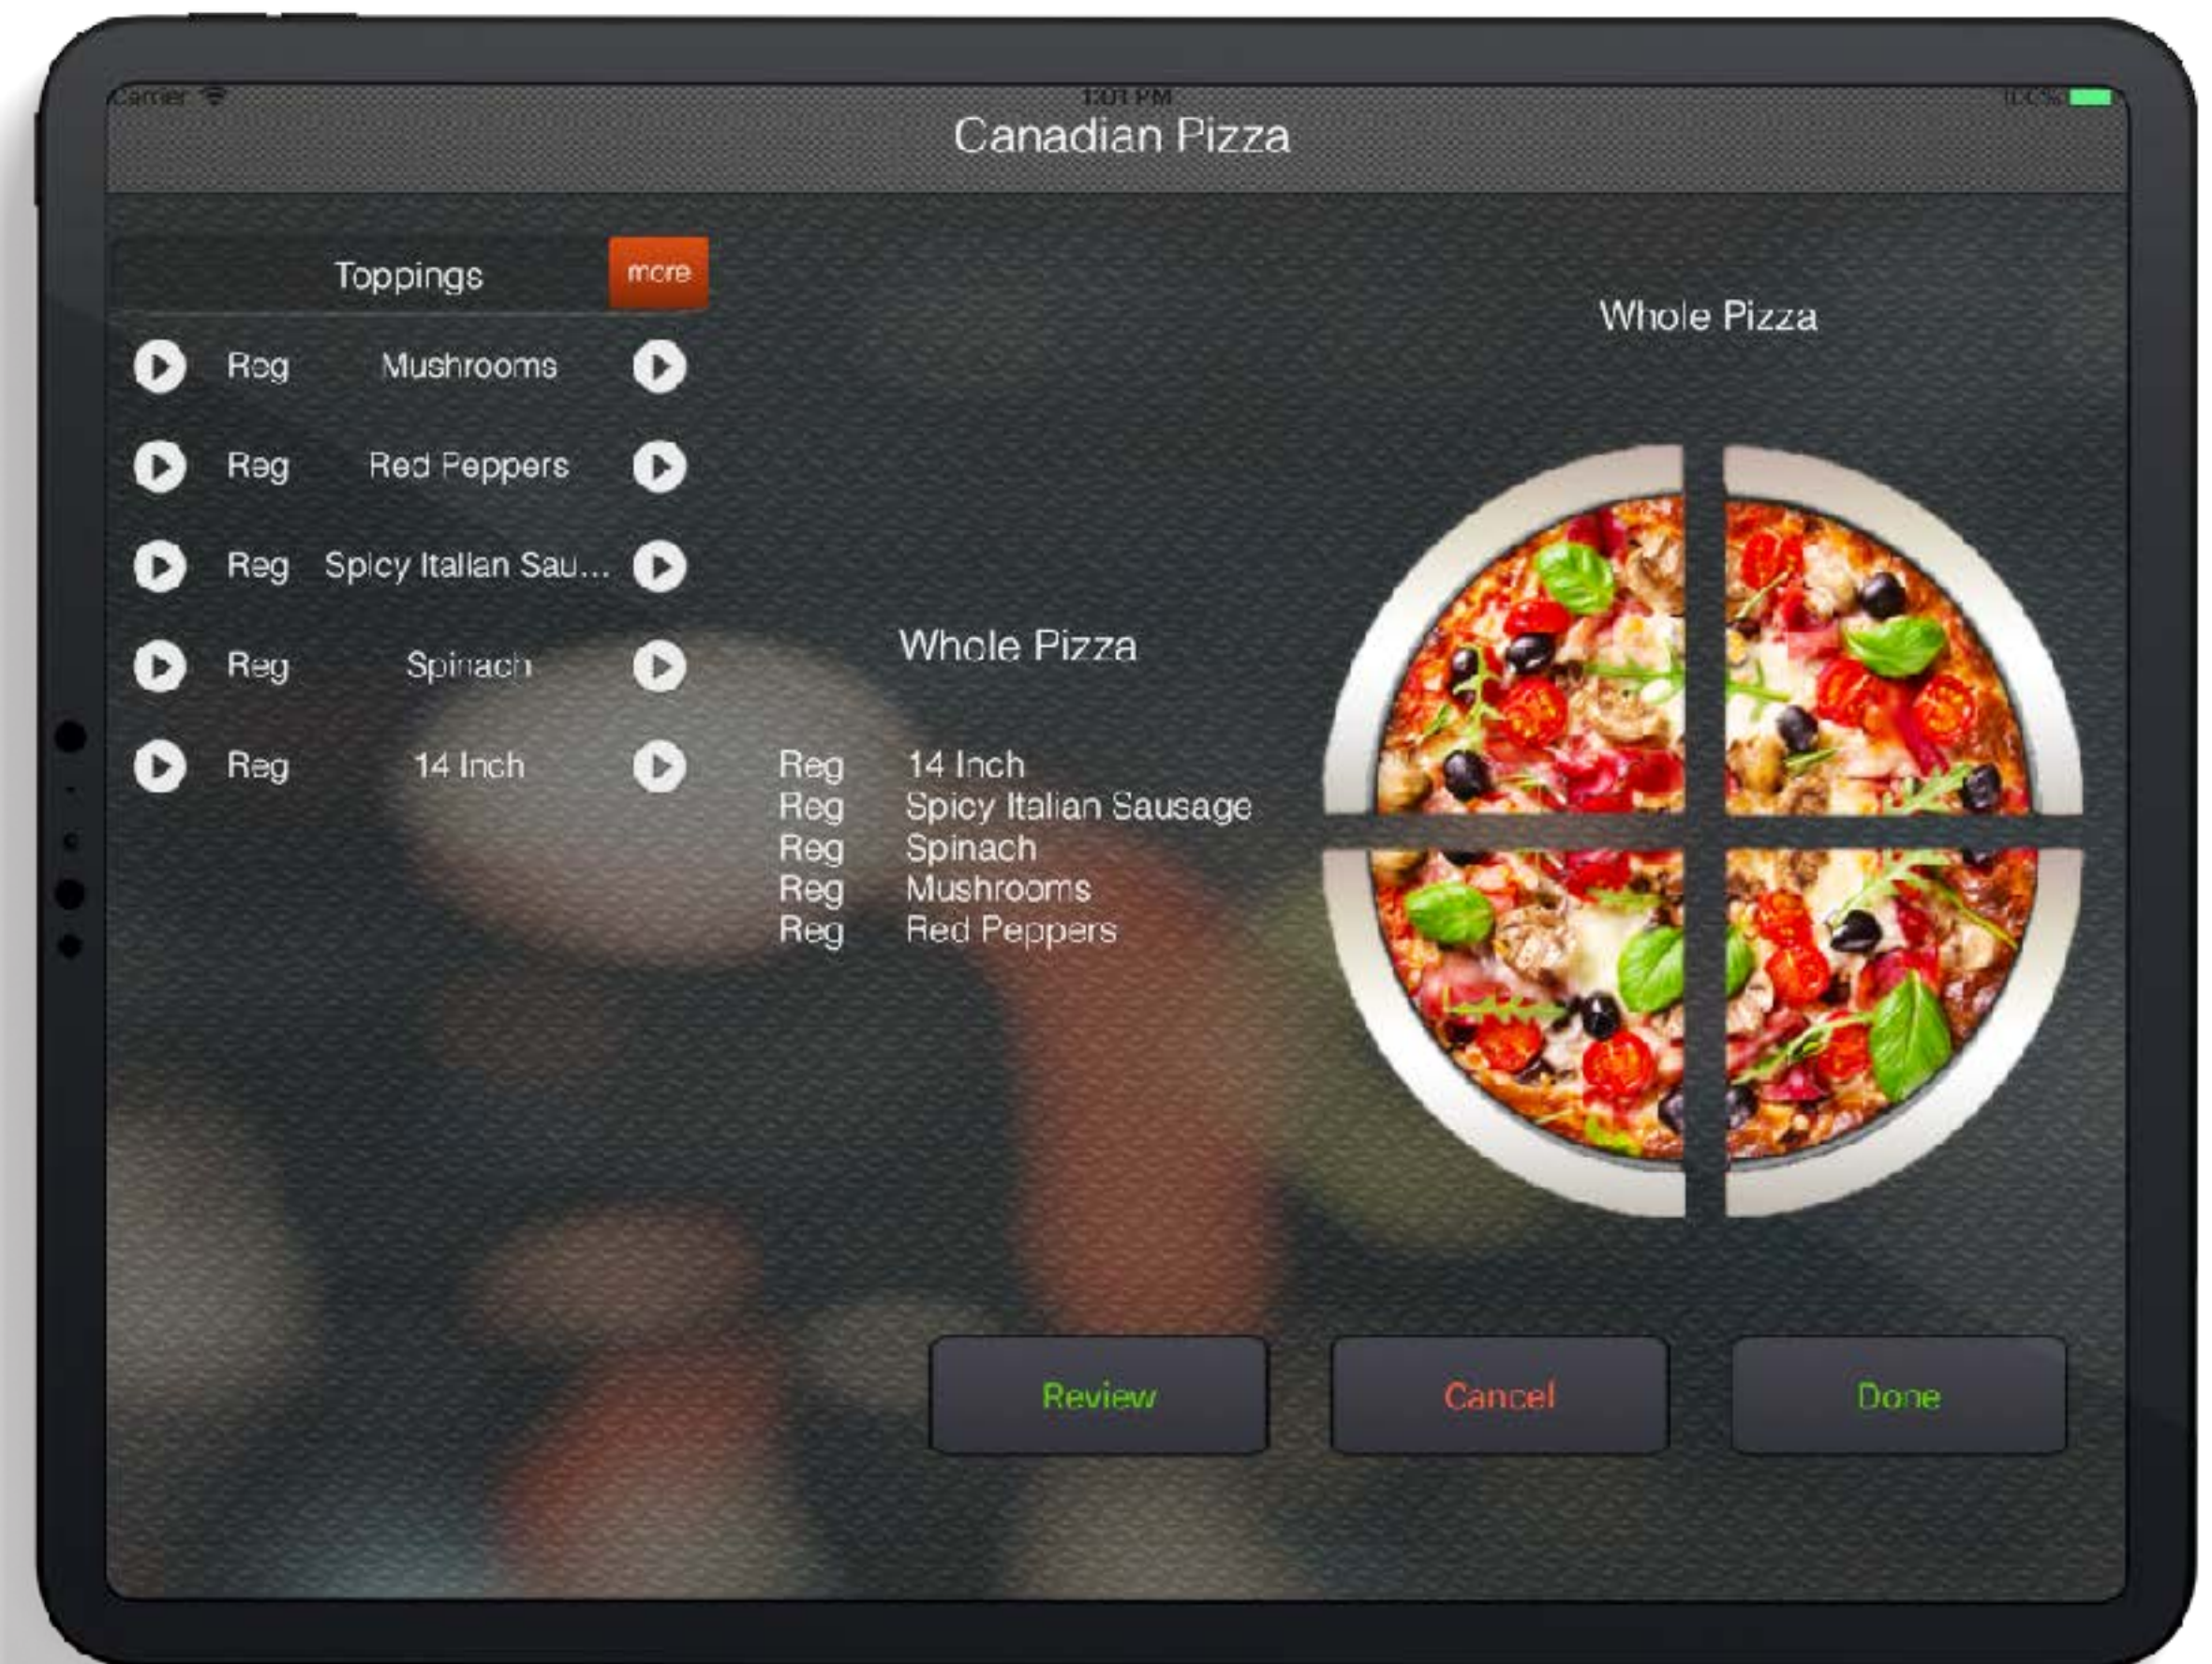

More choices and features to suite your needs.

We understand that most POS systems comes with features for the basic, day-to-day things, that's expected. But at Aireus we provide something unique, we provide a truly flexible solution that lets you do things in amazingly fun and easy way, and because we build on a foundation of what restaurateurs expect and need we figured out how to combined a ton of great features that helps shape a truly unique experience that is simple, useful and powerful.

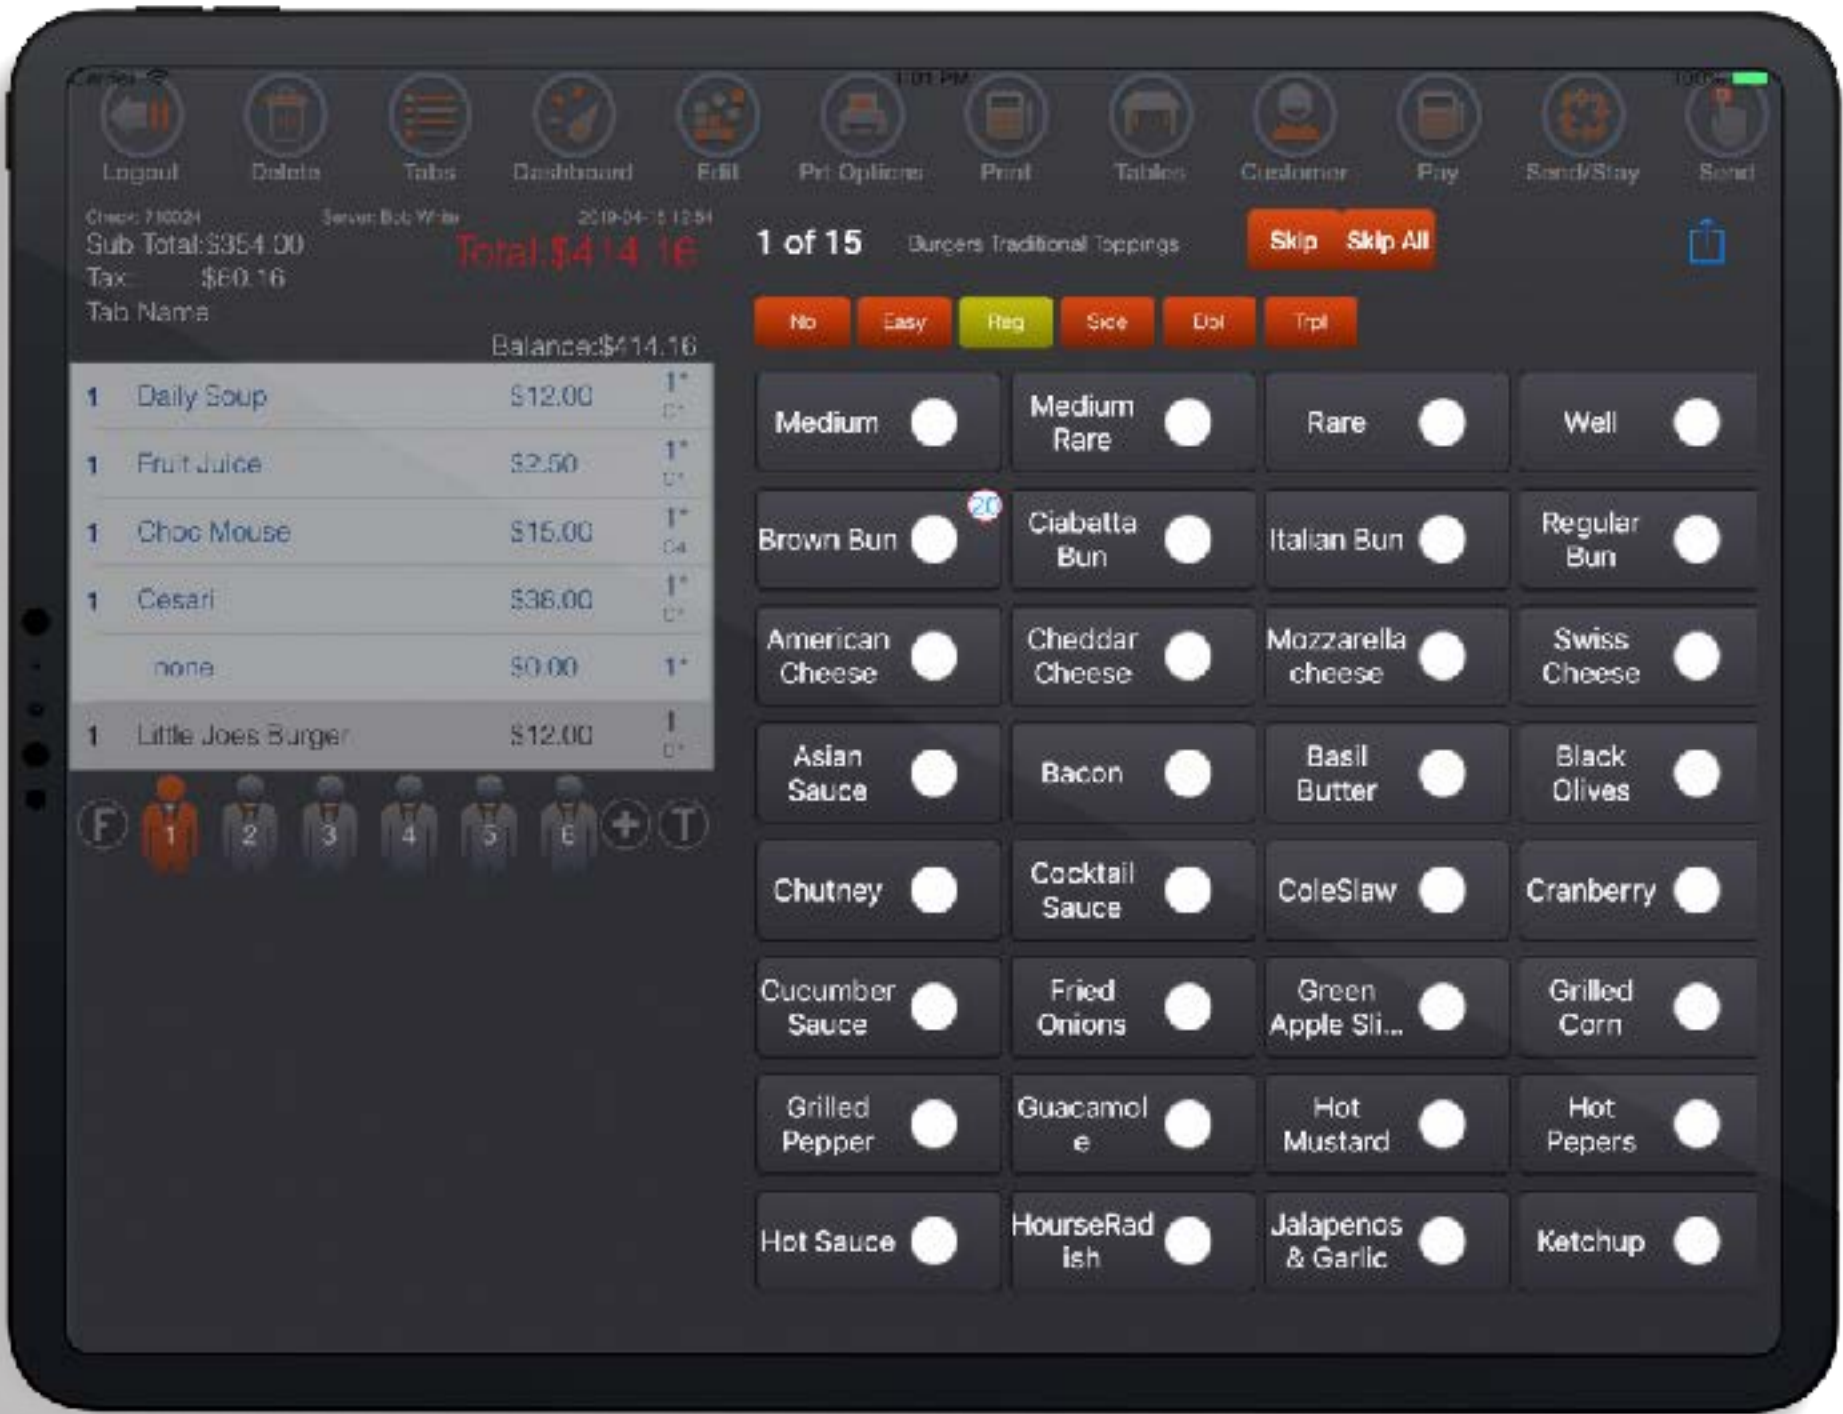

“Everything in the palm of your hands.”

Today's restaurateur requires a point of sale management system that will be available to them via an anytime, anyplace, anywhere philosophy. Gain the high-speed, error-free advantages of visual ordering with the iPad point of sale terminal. Either walk to the table with the iPad or simply mount the iPad on a stand or wall, for mixed use. You can even go truly wireless and completely mobile over the 4G network. Ringing in an order is as simple as selecting its image. ISIS automates all pricing, including support for discounts, service charges split checks and much much more.

API | Custom Development

10

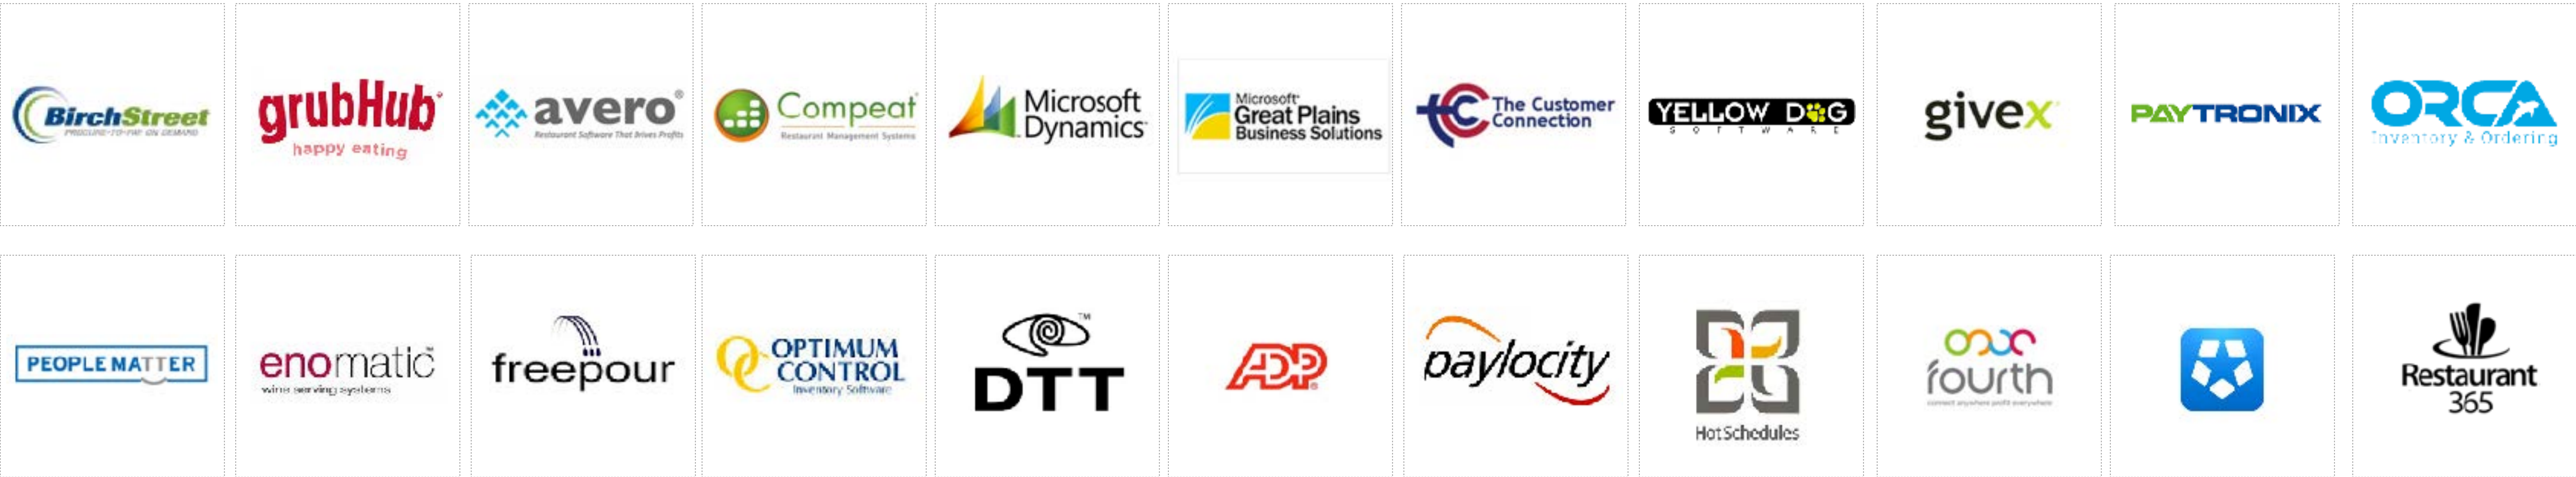

“We rapidly create art of the possible.”

Aireus SOA (Service Oriented Architecture) provides the ideal integration platform for the global hospitality industry. Aireus was designed to provide full integration into diverse environments, delivering the complex, mission critical functionality demands of the most innovative customers. SOA reduces complexity by utilizing B2B integration standards such as web services. Aireus provides a robust API for any type of Integration Services your require to handle business functions, such as order placement from non- Aireus order devices and database imports and exports to other applications

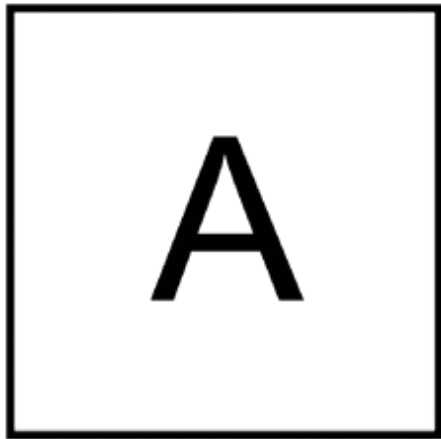

“We have over 100 interfaces to 3rd party partners.”

SOA architecture leads to a more scalable and reliable system compared to server- based models since services are distributed and do not have to be located on a single server. As long as the web services are running on the application server and the server can communicate with the database, the workstations are up and online. Aireus's SOA uses industry standard SOA services that provide greater ability to work with third party applications. SOA also controls the way that the workstations interface with other applications or devices. Interfaces become services that can run centrally or locally. In Aireus, the network can “Scale Out” to incorporate additional servers. This solution is more cost effective as there is no need to replace high end hardware.

"We specialize in custom rapid feature development, ideation and design."

Idea.

Together, we can make your mobile solution idea a reality. We focus, work hard, treat every project like our own and apply our years of experience building and delivering mobile solutions that delight, engage and connect.

Design.

The initial phase of any engagement answers the question "what is the ultimate purpose of the feature" from both a company and user perspective. We work with you to understand your ideas and make them reality.

Build.

The goal of the user experience and graphic design phase is to deliver an application that is intuitive, easy to use and stunningly beautiful. For all aspects of the development process we work along side you to deliver exactly what they want.

Deploy.

We help you create a plan that defines and prioritizes feature deployments training by testing and delivering projects to the restaurant on time so your release will meet business goals and solve users needs.

Aireus back office delivers reports and charts over the Internet. It is available at any time, from anywhere that an Internet connection is available: from corporate headquarters, from a laptop on the road, or from the couch at home. Like POS reports, Portal reports are available on a variety of scales. Reports can be taken for an individual restaurant, for selected individual restaurants, for a predefined group of restaurants (i.e., a district), or for the entire enterprise.

“Waiting for you Everywhere.”

3rd Party Interfaces.

Aireus is able to interface to any 3rd party data warehouse application via exports.

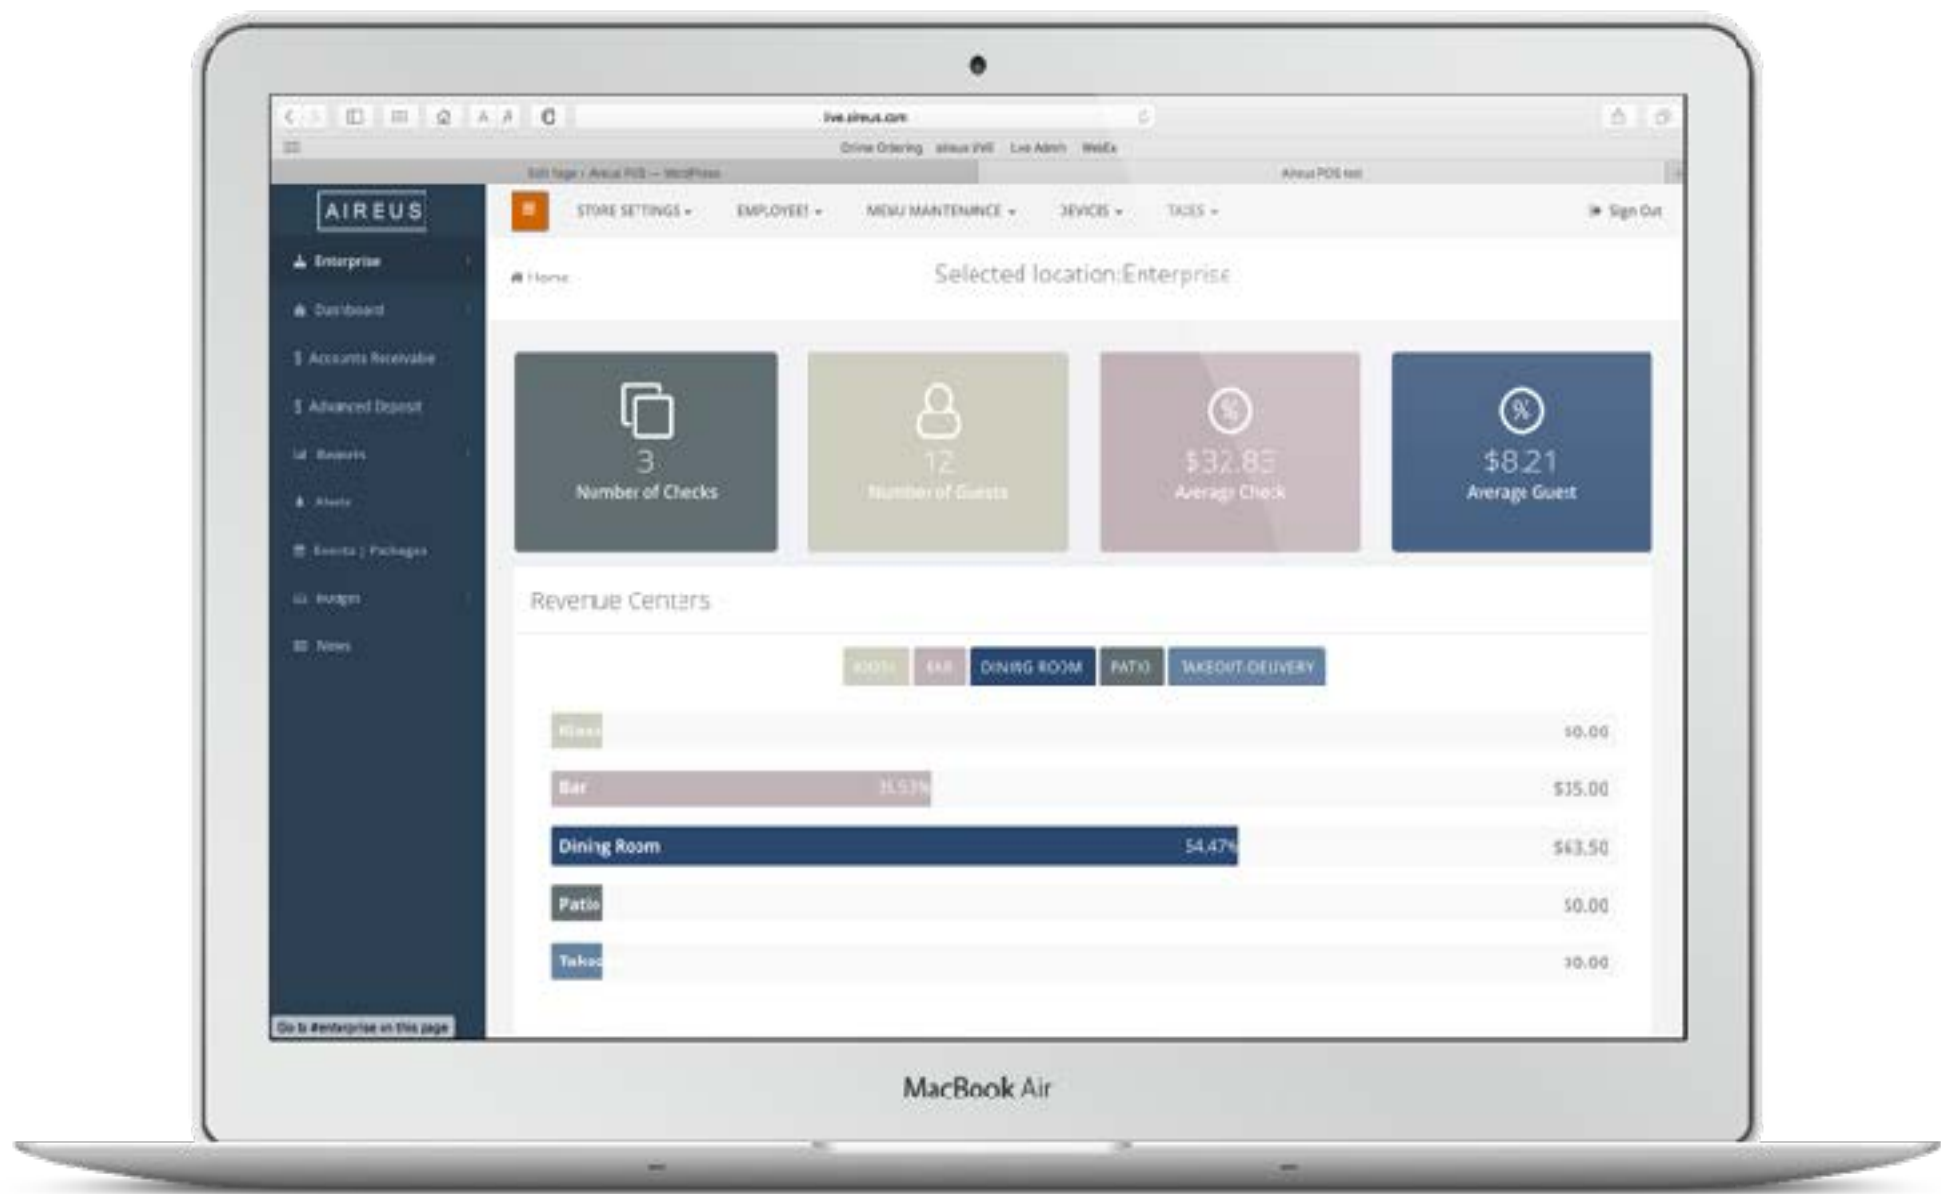

Reporting Support

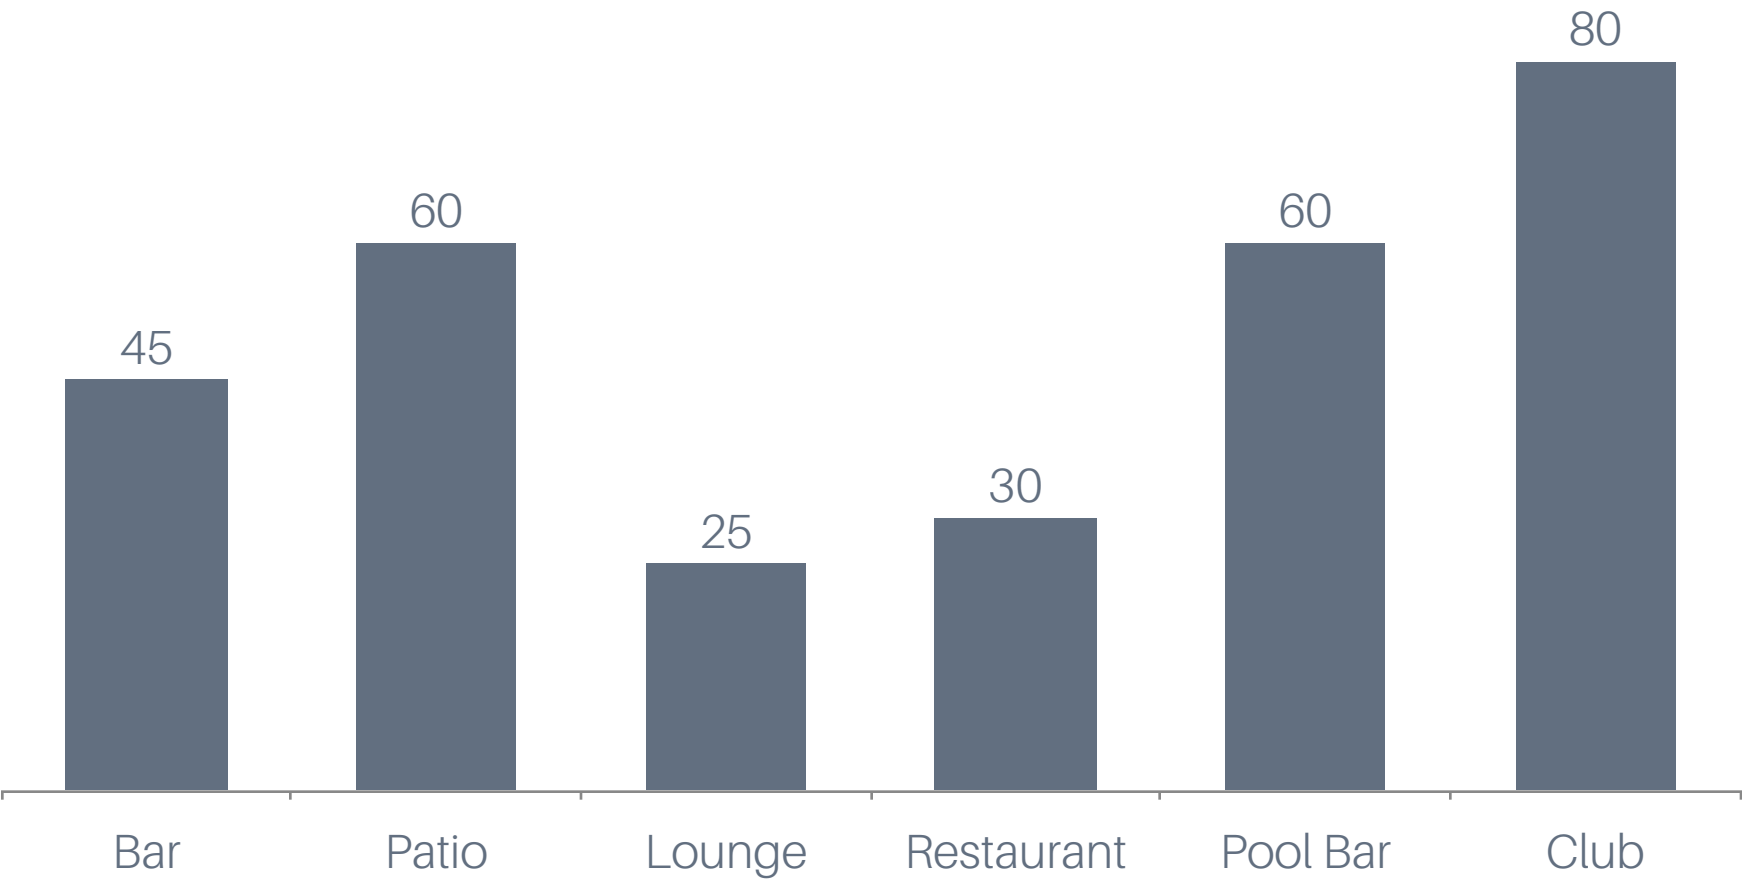

Aireus Reporting provides data warehouse functionality. All reports can be filtered and parameterized by the user as necessary and converted into exports on the fly. A standard export of nearly all data is available, as well as the ability of the user to define exports in Aireus oft Excel using our iQuery tool.

“Anywhere access, anytime, anyplace.”

Both back office and workstation reporting for Aireus is done through our browser based Aireus Reporting engine and their underlying reporting databases. The product allows for easy to access, drill down information grouped in as many overlapping and changeable reporting hierarchies as necessary. Users can start by viewing Enterprise sales and drill all the way down to a specific check detail at an individual site.

“Anywhere reports analysis. Even from your iPad.”

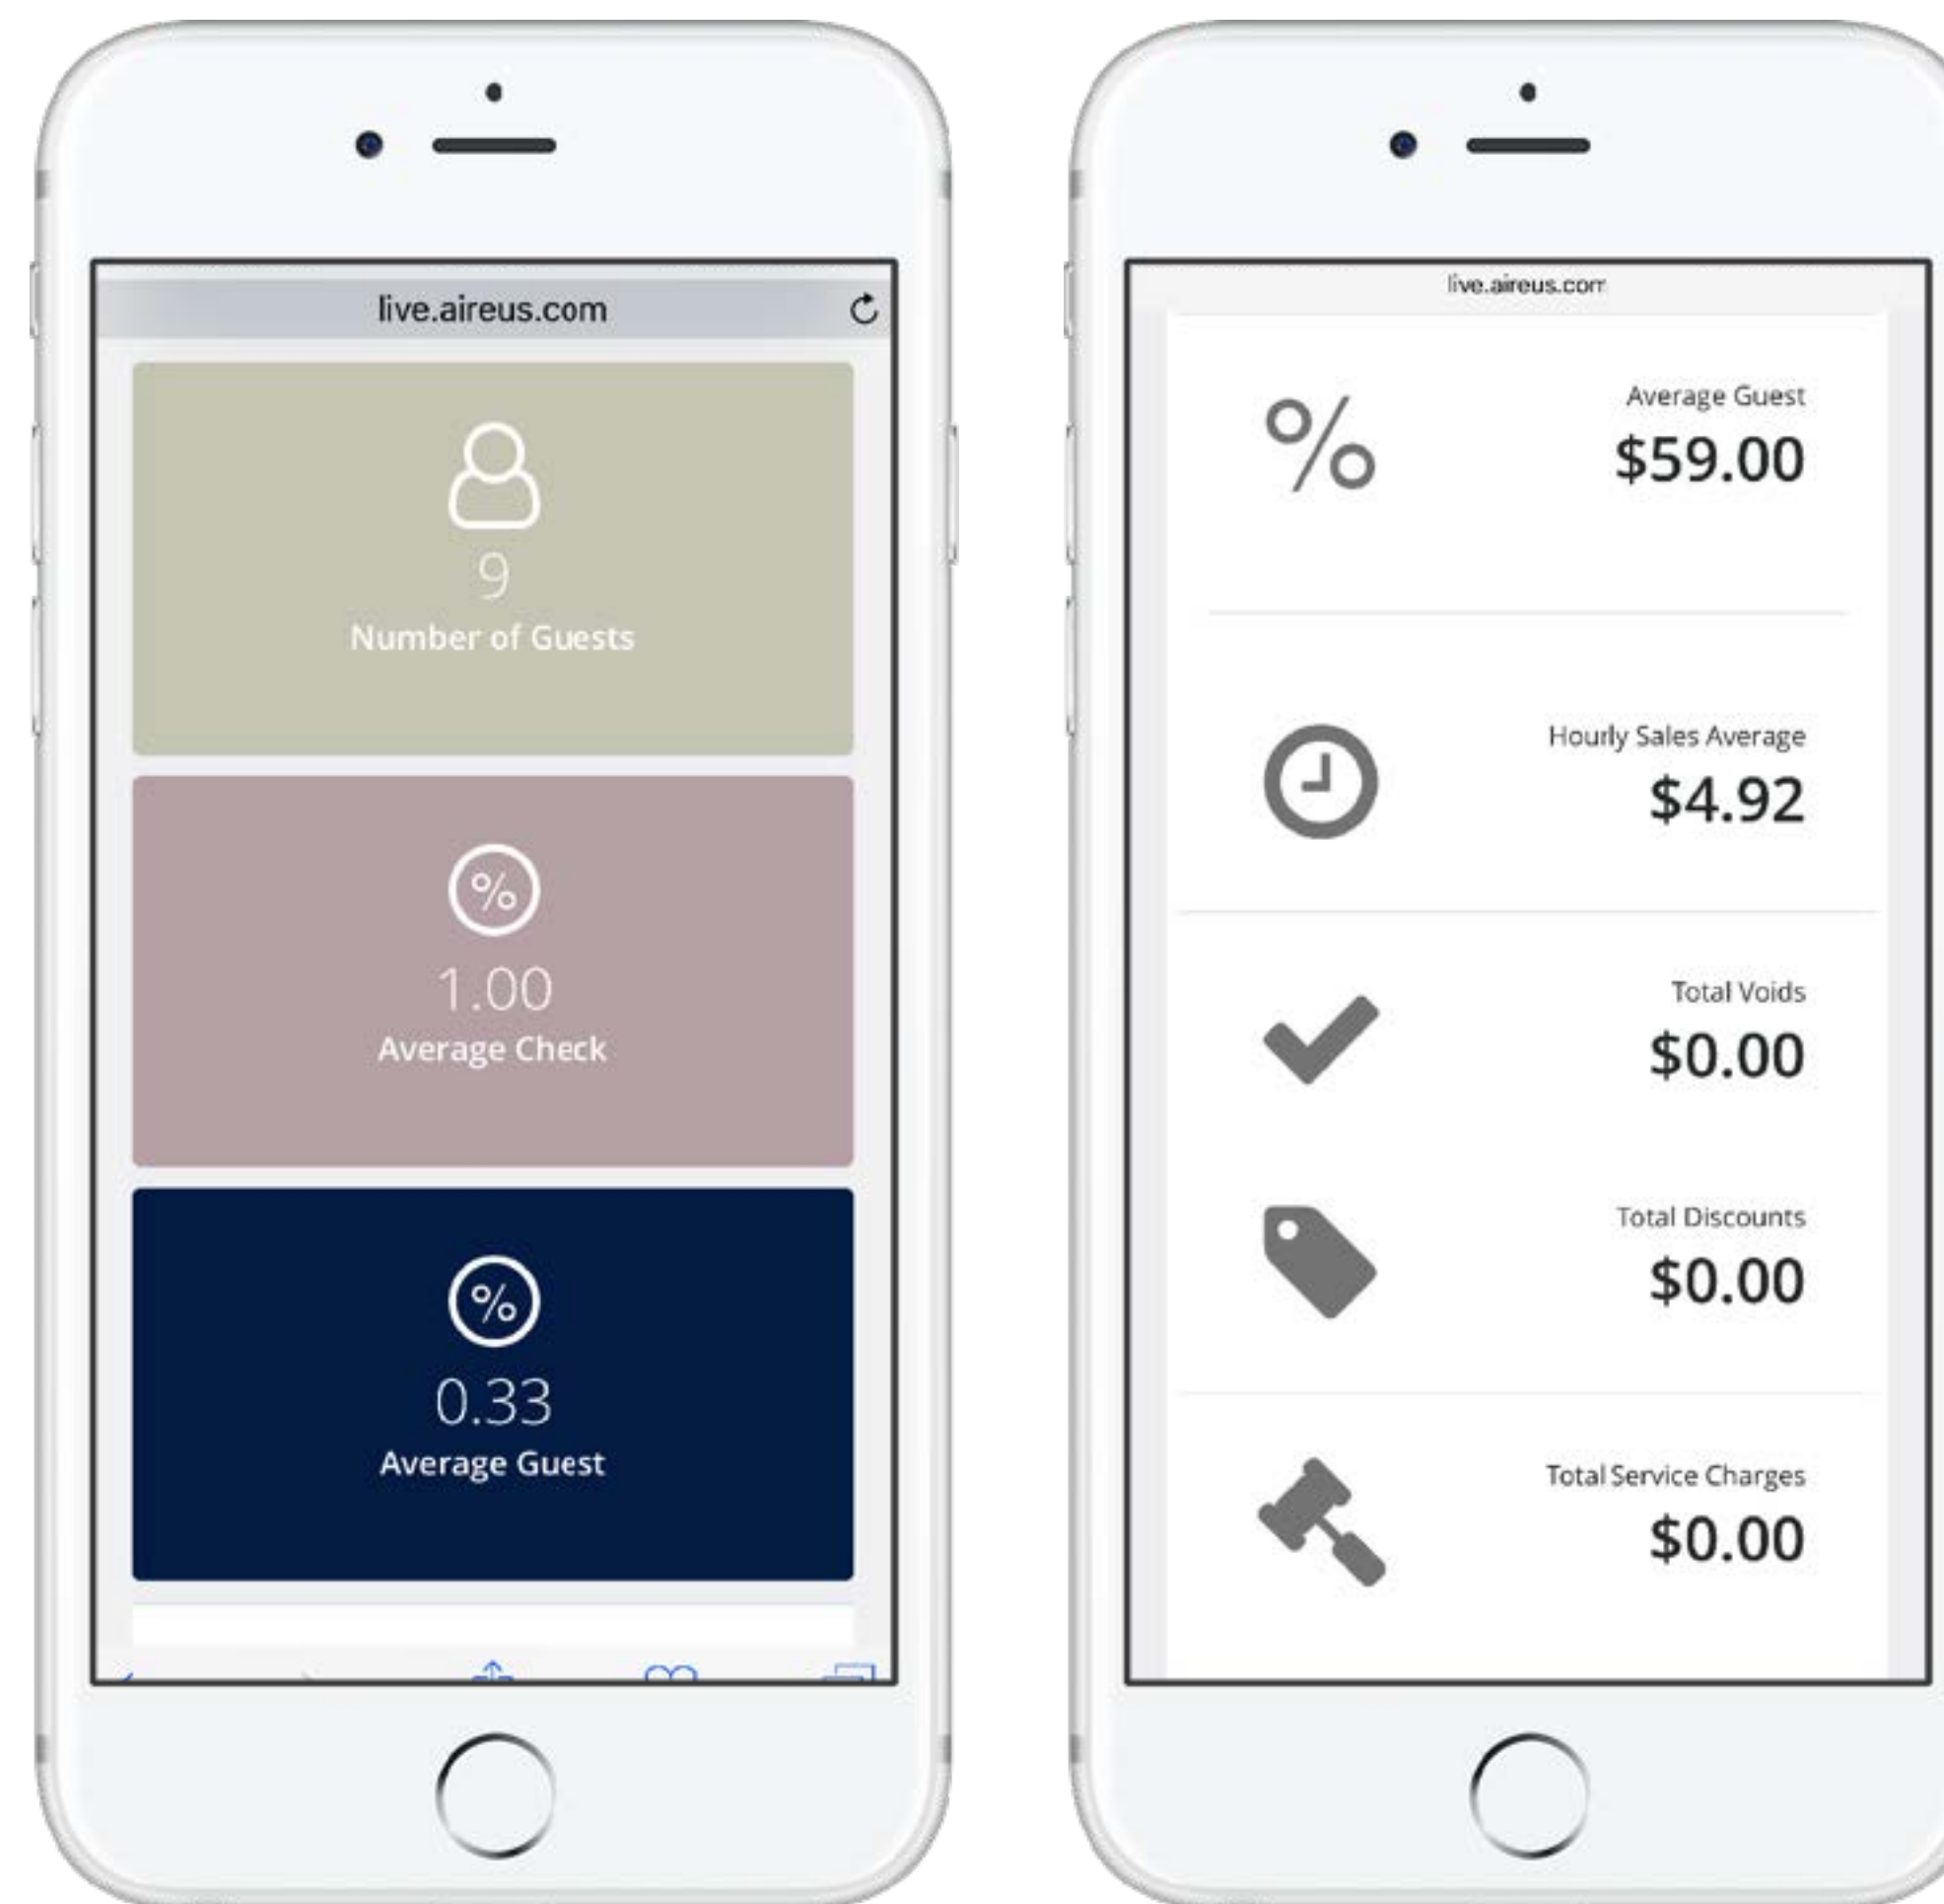

Reports from a laptop or on the road. Aireus transparently gathers information across the enterprise and extensively reports on all facets of your operation. It is easy to use, just access your information via the web.

take it anywhere no desktop required less has never been more

"Yes we support the Aireus back office on a smart phone."

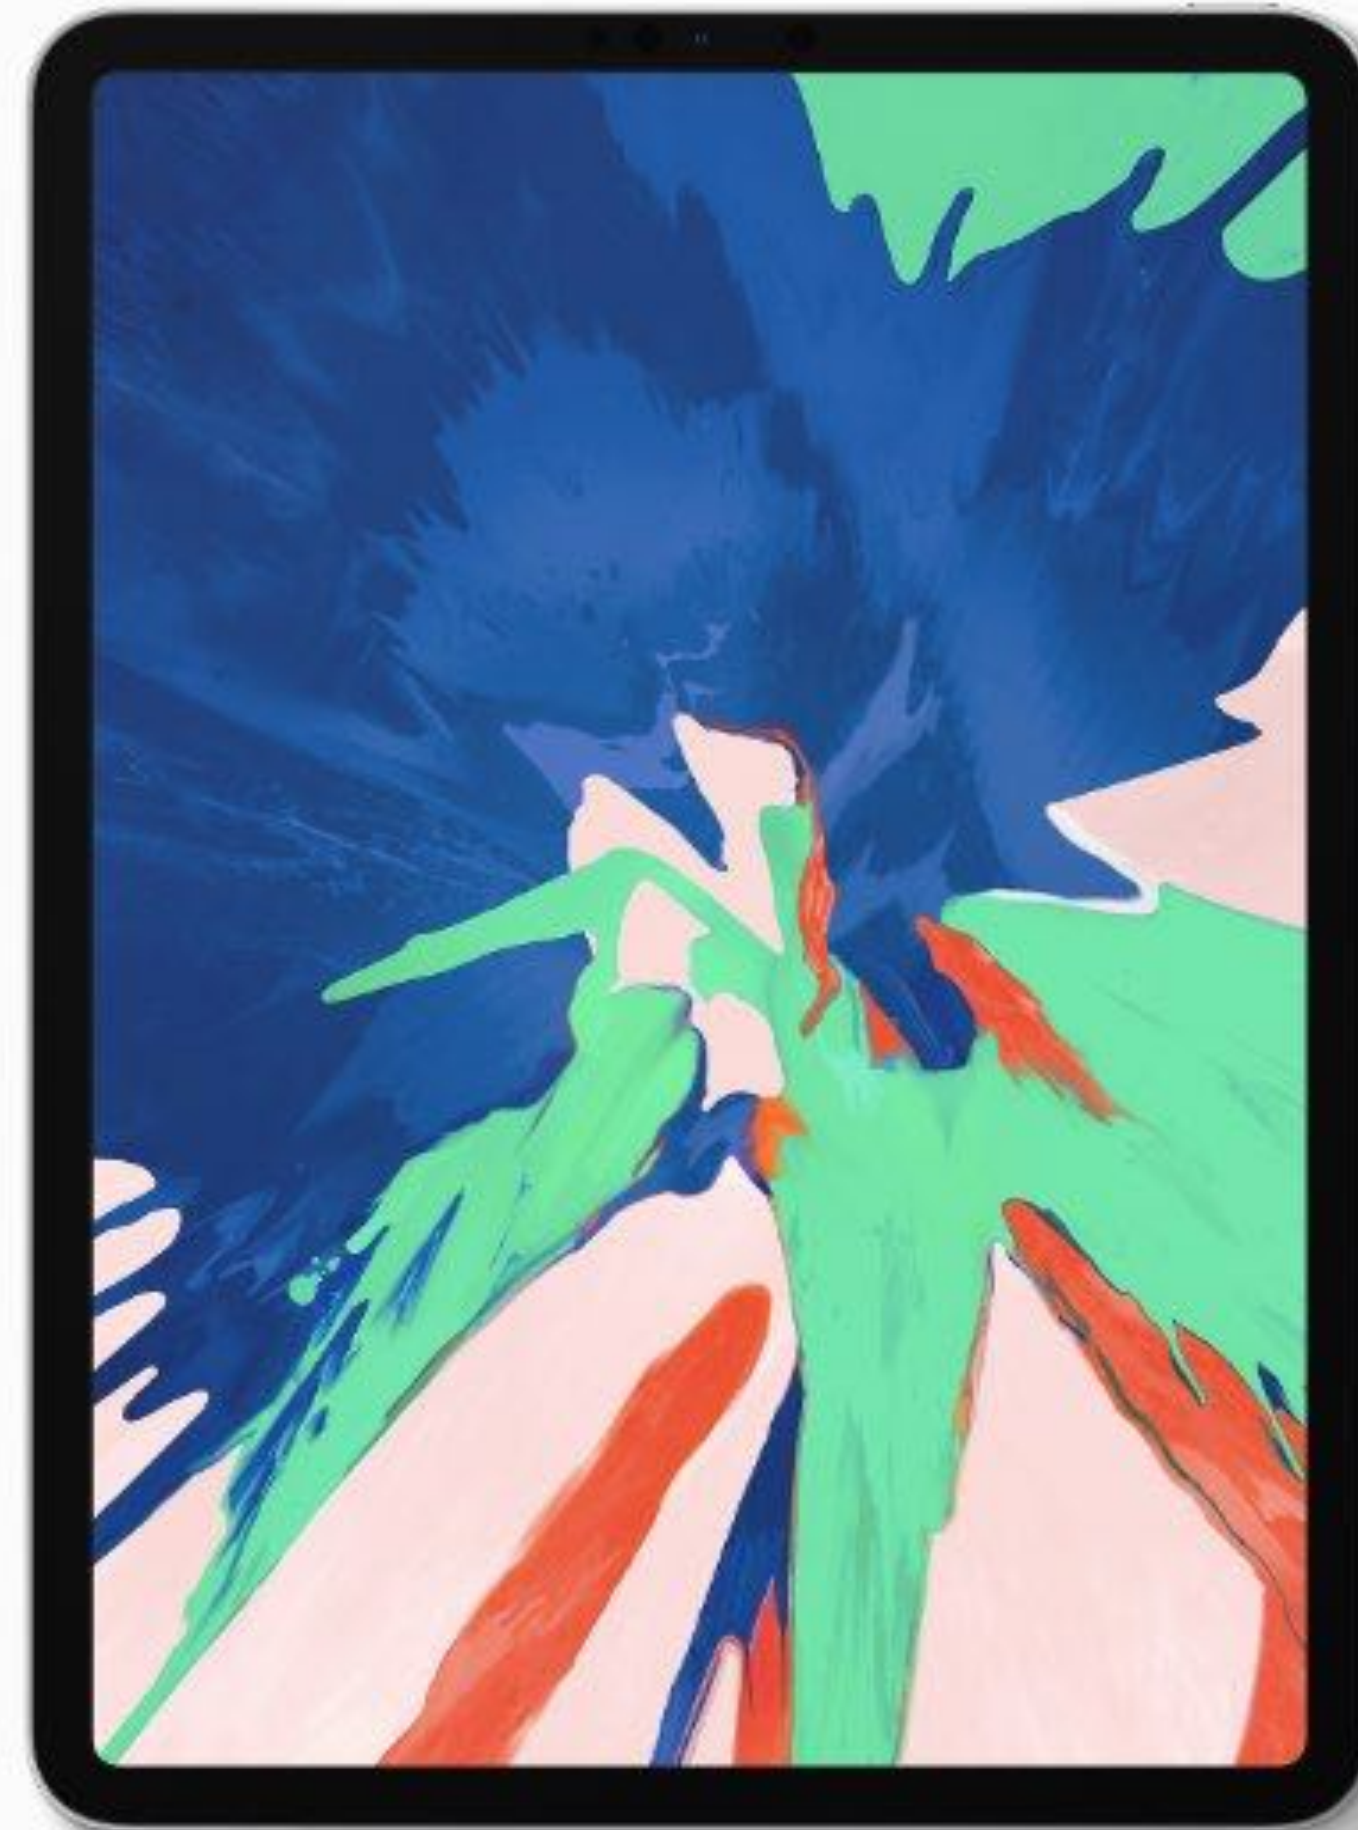

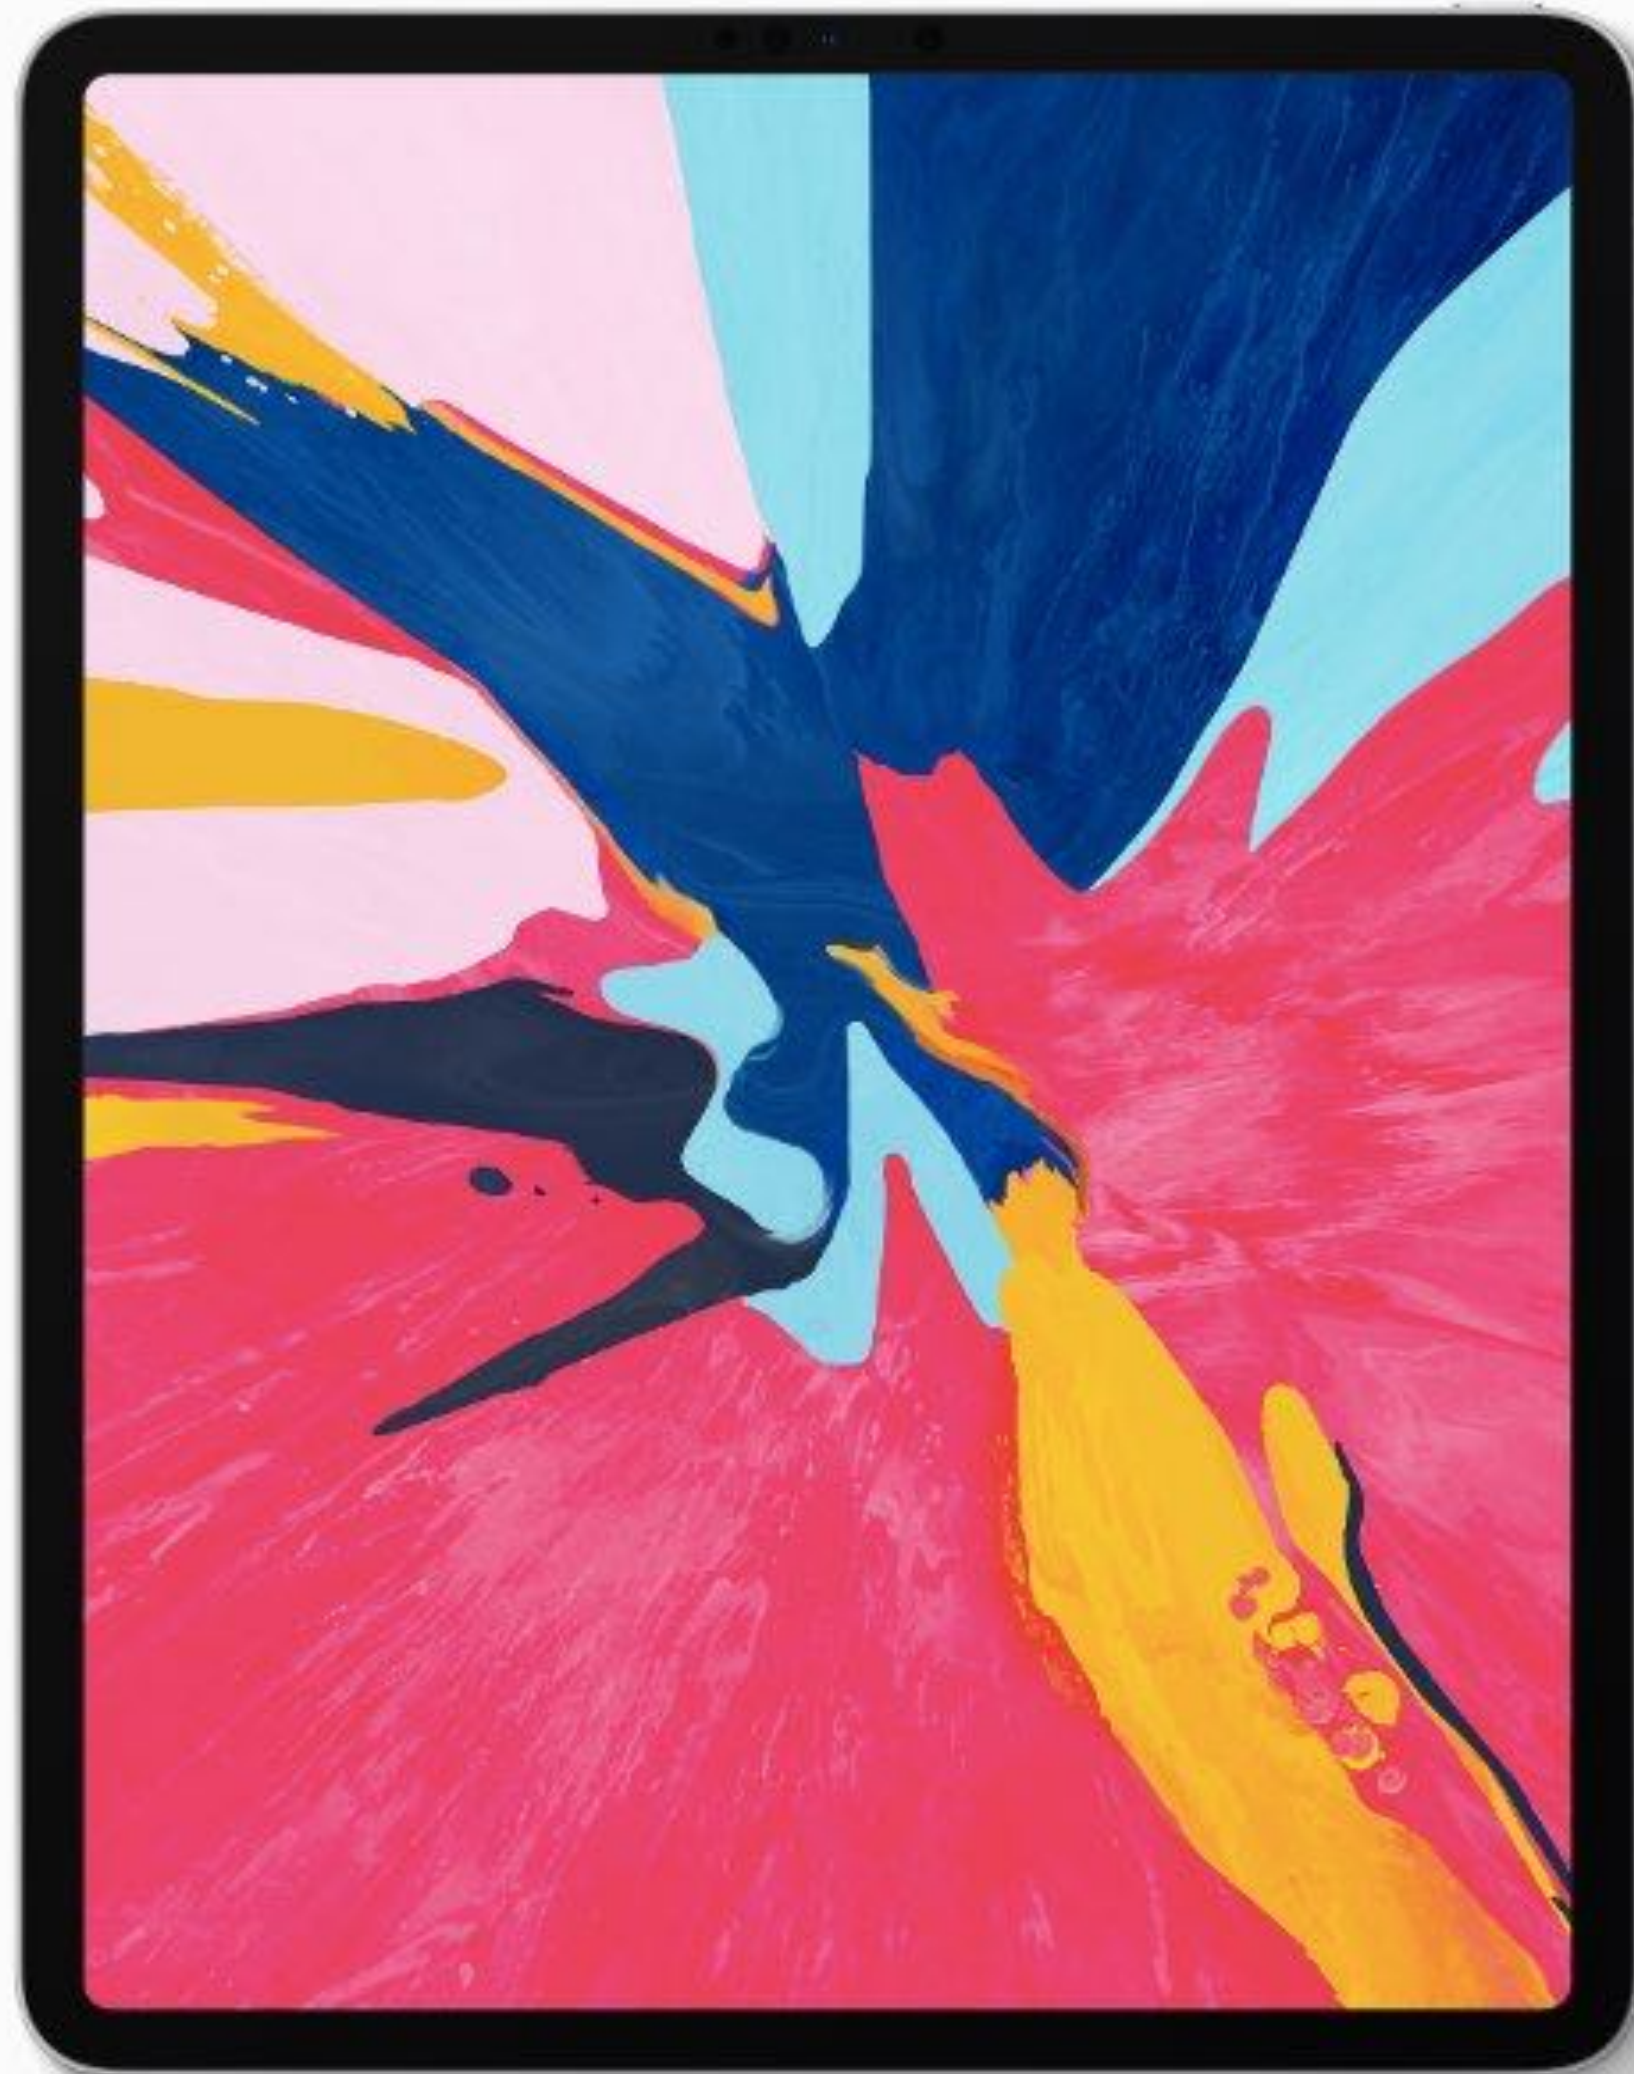

Greater independence and remote access, Aireus helps customers become mobile. Employees can access work-related information from anywhere. Infrastructure is maintained by Aireus so accessing the store is easy, just a click on your web browser, In this way users access the application independent of place and infrastructure from a PC, laptop or a handheld device.
